N Aperient and sommand preparation of IRON purified of Oxygen and Carbon by combustification of the Marchael States, and rities, both in Europe and the United States, and ribed in their practice.

• experience of thousands daily proves that no

trial of this restorative has proved successful to an extent which no decorption nor written attestation would render credible. Invalids so long bed-riddon as to have become forgotten in their own neighborhoods, have suidenly re-appeared in the busy world as if just returned from protracted travel in a distant land. Some very signal instances of this kind are attested of female sufferers, emaciated victims of apparent marasmus, sanguneous exhaustion, critical changes, and that complication of nervous and dyspeptic aversion to air and exercise for which the physician has no name.

In Naxous Aryzorious of all kinds, and for reasons familiar to medical men, the operation of this preparation of iron must necessarily be salutary, for, unlike the able sensation.
It is this latter property, among others, which makes
it so remarkably afactual and permanent a remedy for
Files, upon which it slos appears to exert a distinct and
specific action, by dispersing the local tendency which
is specific action, by dispersing the local tendency which forms them.

In DISPERSIA, innumerabless are it causes, a single box of these Chalybeate Pills has often sufficed for the most habitual cases, including the attendent Contrevens.

In unchecked Diagrams, even when advanced to another the amortishing and apparently may

inguals, the scale pains, lose of fiesh and strength, debilits' ing cough, and remittent heetic, which generally indicate iscurrant Communities, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances.

In Schotzuous Tunascutosis, this medicated from has had far more than the good effect of the most cantiously balanced preparations of iodine, without any v of their well known liabil

rited to this remedy and restrative, in the cases peculiarly affecting them.

In RESUMATION, both chronic and inflammatory—in the latter, however, more decidedly—it has been invariably well reported, both as alleviating pain and reducing the swellings and stifleness of the joints and muscles.
