The designs are furnished by Mr. Pook, naval constructor; the boats will be ball proof. They are intended to be ready for delivery at Cairo on the fifth of October. "Union" Forever -There is a little township on the borders of Washington county, which adjoins Snowden township, in this county. The highest vote ever cast in the district was 330. Yet Union township (so it is called,) has sent out one hundred and eighty men in defence of their country. They enlisted in various compa-nies, in squads of about twenty, and are all privates—the township not furnishing a single officer. All honor to the banner township of old Washington. "Union" township is worthy of her name.

THE HAMPTON GUARDS -This is the title of a company named in honor of our distinguished fellow citizen, Hon. M. Hampton, President Judge of the District Court. The officers are Capt. J. S. Little; known to be gentlemen of military experience, and those desiring active service under good men, cannot do better than enlist in this company.

GOLD FOR GIVING TENACITY TO IRON. —A process has been invested for an improvement in the manufacture of iron and steel during the operation of puddling. A small quantity of gold is introduced, which, by diffusion throughout the mass, is said to confer extraordinary advantages. The process is to be applied to the manufacture of artiflery ships' plates, anchor cables, and all those portions of railway plate in which tenacity is most essential.

A NOTE and letter sheet has been invent. ed which is so folded as to furnish its own envelope, and it has the government post-age stamp on the outside. The advantages to the user are the conveniences afforded in despatching a letter, and the Government has the security that the same stamp will be used only once. It is estimated that a million of letters are sent to the dead letter office annually from the loss of the pasted stamps in their transmission through the post offices.
