THE UNION CONVENTION. Harmonious Proceedings.

The Union City Convention, which assembled vesterday to place in nomination a ticket for our approaching municipal election, nominated for Mayor, HENRY A. WEAVER, Esq ; for Controller, WM. LITTLE, Esq., and for Treasurer, JOHN C. DAVITT, Esq.

We doubt very much that if the city were searched most carefully, three more competent or trustworthy gentlemen could be selected for the respective places named, than those who have re ceived these nominations.

Mr. Weaver left the Mayor's office only two years ago, with a reputation for energy and tact in the administration of his affairs unsurpassed by that of any of his predecessors. He made an admirable chief magistrate and the people will be doing themselves a service by electing him again.

Mr. Little, the nominee for Controller is a gentleman of the highest administrative ability, whose character for integrity is beyond suspicion. He was formerly Mayor of this city, having been elected as a citizens' candidate over the late W. W. Irwin, since which time he not probably be repeated. - has been devoting his time to mercantile nursuits. Mr. Little belongs to one of the old Pittsburgher's families, having been born within the bounds of the present city; his father came here, we believe, prior to the beginning of the

present century. Mr. John C. Davitt is pretty much the same as Mr. Little; quiet, methodical and unobtrusive: he is a most admirable accountant, and one of our most esteemed and worthy citizens. He, a few years ago, filled the offices of city the land of Palestine, have enjoyed the frust of and county Treasurer in a most satisfactory manner, and if elected, will again prove himself a faithful public servant.

Altogether, this ticket is beyond question the best we ever nominated for municipal places, and should the people fail to endorse it at the polls, they will thereby manifest an indifference to their putlic affairs unworthy of a vigilant and intelligent community. In conclusion, we submit the ticket to the careful consideration of every class of our fellowcitizens, and in order to elect it we invoke their co-operation and support.

JUDGE MELLON'S CHARGE-

A GLOOMY PICTURE. We published in the local department of Judge Mellon's charge to the Grand of our gravest consideration. In the meantime we would very earnestly recto every citizen, for he will find in it matter which will attract universal atunless something be speedily done to feels for the distress of o hers, and plenty with w effect a settlement with those who hold the bonds of our county, we will by the end of next year be literally overwhelm-

ed with taxation. We infer from this charge of Judge and kin." They desire produce, and the county Mellon's that he sees no hope of escape is the place to obtain such; and slotted necessary from the payment of the interest upon these railroad bonds. He was, himself, ly identified with the anti-tax party of this county, and we presume he thinks now upon the abstract question of "taxing people without their consent," pretty ness in question. More than this, he far the most binding of our obligations. Judge Mellon proceeds to state:

"But by another legal fiction, though it meritorious, it is placed far above all other debts. In most general or public corporations there is no individual liability, but lay it as a tax with other rates and livies for tax purposes. Indeed it takes prece. dence of rates and levics for the general cent, on the excess of all incomes over eight hundred dollars, and a very considerable amount of revenue would result to the government from this very source in this county, were it not for the incubus of

this railread debt, and the position which has been assigned to it. "You have seen by the foregoing figures that it swallows up all incom, for the its safety, the British government should command 1-h journal of this morning will probably arrest present from real estate or other property.

It also takes precedence of all other incumbrances. Ground rents and first mortgages must stand back till the bondbolders'

levies for other tax purposes are collected; and here the necessity for pr. mpt action, and there is no occasion for reflections against the bondholder. It is not his fault hat we are in such predicamen'; and it 's natural and to be expected that he will take the most he can get by his security and use all the remedies which favorable

legislation has placed at his disposal. We conclude from the reading of this charge, that there is no escape from the payment of this railroad indebtedness f there was, Judge Mellon is the man to discover it. There being no escape, let us try and make the burthen as light as possible by compromise first and vigorous settlement after. If we are bound or one settlement after or one settlement after. If we are bound or one settlement after or one settlement after. If we are bound or one settlement after or one settle to pay, the sooner we begin the better, and with these few remarks we leav the suggestion of the ways and means to those whose interests in the question are far in advance of ours.

In case of a war with England the Press speculates that the land engage ments would probably be in the extreme northeast, on the coast of Maine. In view of this fact, we are gratified to learn that the hardy men on our Eastern frontier are fully alive to the responsibility as well as the danger of their position They are preparing to fortify their coast and to organize such a land force as would render invasion from Canada pow-
