

THE EFFECT OF IT.

It is almost impossible to calculate the value of our recent magnificent victories over the rebels. A contemporary estimates their effect at home, here, at five hundred millions of dollars, but in other than moneyed valuations, their importance is incalculable.

There is now no doubt as to the ability of the United States government to sustain itself against internal commotion, no matter how earnest and formidable, while the wonderful gallantry, impetuosity and endurance of our soldiers, demonstrate that the Union being restored is capable of defying a "world in arms."

It is the great desideratum, the reunion of the States. With this, it is emphatically strength with us; without it we would be at the mercy of every petty power that felt like snubbing us.

The news of our late engagements at Roanoke and Fort Monroe, will have a stunning effect upon the English government. The aristocracy there, who have been for thirty years plotting and praying for the dissolution of the Union, will see that this democratic government is not the decrepit thing they imagined.

They will perceive that their well-concocted and dangerous abolition crusade is a failure; that the government is enthroned in the hearts of our people, and that no matter how ably they may plot, or fanaticism which, the people are true to their institutions, and able to defend them against the most formidable rebellion, as well as against any conceivable foreign invasion.

John Bull must therefore turn his attention to some other means for dissolving this Union; his abolition crusade has proved a failure. Our government, strong in the affections of the people before, will become doubly so soon as the Union is restored.

They and the world will then behold a nation, which was but an experiment, an established fact. Democratic governments will have ceased to be a problem, and all discussion as to the capability of man for self government will become obsolete and forgotten.

The liberals of the old world will take courage and feel invigorated for increased warfare against tyranny and oppression. The world will take note that here a republican form of government has in a few months presented a most formidable rebellion, and upon its ashes, peace, contentment and increasing civilization, upon their luminous wings, soar in triumph throughout the land.

The rebellion and its leaders crushed, there will spring up a class of men in the new States, who will be capable of not only teaching but practicing Democracy.

Conversion of the Republic of Mexico

The Morning Post (supposed organ of Palmerston) says that it has now been determined, with the assent of Great Britain, by the Courts of Paris and Madrid, that their armies shall march direct from Vera Cruz to the capital of Mexico, and there suppress the existing executive.

England will limit her active military co-operation to the presence of a powerful squadron in the Gulf of Mexico, and to guaranteeing the fort of San Juan d'Ulloa with a force of seven hundred marines during the continuance of the healthy season on that coast. This force, when the season grows unhealthy, is to be replaced by acclimated Cuban troops.

"We believe that it is a probable result of this march of the allies on Mexico, that the unhappy and distracted republic will reappear to the world as a constitutional monarchy, and that the Archduke Maximilian, brother of Francis Joseph, Emperor of Austria, will assume the title of King of Mexico. It will not be impossible, if funds necessary to maintain an army of occupation in support of the new government are provided, until it will have derived sufficient stability to stand alone.

The Morning Herald's Paris correspondent says that, in addition to the troops already sent off, four more batteries of artillery have received orders to hold themselves in readiness to start at an hour's notice. The allied troops are to advance on the city of Mexico early in March. There will be no nominal commander-in-chief. The military commanders and the admiral will act according to the decisions of a council of war, as in the expedition to China.

A neat letter. There has just been a neat letter which was addressed to Commodore Foote by John A. McClelland, Brigadier General commanding First Division near Fort Henry. It was written the day after the capture of the fort, and reads as follows:

"Dear Sir: As an acknowledgment of the commensurate skill with which you brought your gun boats into action yesterday, and of the address and bravery displayed by yourself and your command, I have taken the liberty of giving the late Fort Henry the name and more appropriate name of 'Fort Foote.' Please pardon the liberty I have taken without first securing your concurrence, as I am hardly disposed to do, considering the liberty which you took in capturing the fort yesterday without my co-operation."

Gen. McClelland promises to win as far a reputation for writing military letters as he did for making sensible and pungent speeches while in Congress.

The Accident to the Gunboat Essex. A private letter dated Feb. 10, from an officer of the gunboat Essex, gives the following description of the accident to the Essex, Captain Porter's gunboat, at Fort Henry, and its horrible consequences:

"It was a 32-pounder that did this business, passing through the edge of a bow port, striking a strong bulkhead and plump into the boiler. He only had about 60 pounds of steam on, just enough to stem the current, or, just enough to have kept the boiler from being killed. As it was, it was killed and wounded. Porter was standing near the gun and to the effect of giving an order to a bright young lad, named British, the son of a clergyman in New York, when the ball came through, carrying off British's head, before going into the boiler. The pilot house was directly over the boiler and the communication to it was from below. The two pilots had no way of escape and were literally killed to death. They thrust their heads out of the little ports, which was all they could do. Some of the crew rushed out into the open air, and the steam in front of their clothes and skin hanging in threads from their bodies, and with their hair, breath shouting: 'Hurrah for the Union!' Another pilot, while dying, being told that the Fort had surrendered, said, 'I die content.' Another, with blistered hands, pulled the string to fire another shot, but the steam had dampened the priming. Several poor fellows jumped overboard to escape the steam and were drowned. Altogether it was an awful scene, the contending ships and the Fort, the roar of battle and the hissing steam sending its deadly breath into every pore of the devoted crew."

Honors to Gen. Buell

Resolutions authorizing the presentation of a sword to General Buell, and tendering the thanks of the General Assembly, to the officers and men under his command for the victory at Roanoke Island, passed both branches of the Rhode Island Legislature on Friday.

Arrival of the Steamship Ariel. The steamship Ariel, from Newport on Friday, with the mails, passengers and treasure from California. Her treasure list foots up \$214,118.

Discharged. Flag-officer Dupont has discharged and sent home Mr. Stout, clerk of the U. S. steamer Flag, for writing a letter to a Philadelphia paper, giving certain information deemed of importance to the Confederates.

A Visit to the Tomb of Henry Clay. A correspondent of an Eastern journal writes from Lexington, Kentucky, under date of Feb. 3, as follows: A short distance north of the city of the living is the city of the dead. It is a pleasant suburb—one which is adorned with parks of great beauty. It is laid out in beautiful avenues, grass bordered, and shaded by grand old forest trees. I have taken a stroll this afternoon along the silent streets, to stand for a moment by the dust of Henry Clay. I need not attempt a description of the monument, it is completed to his memory. Artistic design, which is a tall, round column upon a broad base, with a capital such as the Greeks never saw or dreamed of, surrounded by a figure intended to represent the great statesman as he stood when enjoining vast audiences by his matchless oratory.

Within the chamber exposed to view through the iron lattice door, star ornamented and bronzed, lay the sarcophagus of pure white marble. The artist has not quite completed it, his tools were lying upon a bench, as if but just dropped from his hands. The sarcophagus is chaste in design, ornamented with gathered rods and bands, emblematic of Union, and wreathed with cypress on its sides. The pure white marble draped in a throw partly back, exposing above the breast of the sleeper, a wreath, and a laurel wreath.

Upon the slab beneath the sarcophagus is this simple, plain declaration: "I can, with unbroken confidence, appeal to the Divine Arbiter, for the truth of the declaration that I have been honored by to my pure purpose, no personal motive—have sought no personal aggrandizement, but that in all my public acts I have had a sole and single eye, and a warm, devoted heart, directed and dedicated to what in my best judgment I believed to be the true interests of my country." A party of soldiers came up and gazed upon the monument while I mused. They had talked loudly while approaching, but their voices died to a whisper, and they stood as if on sacred ground.

Mr. Wagner, a German harness maker in Chicago, has manufactured an elegant hickory cane, of tasteful design and elaborate carving, which will bring to the attention of the President to the President through Hon. J. N. Arnold. The rest for the hand is an eagle, holding in its beak a scroll which contains and twice about a weeping widow, emblematic of the late Senator Douglas. Upon the scroll are inscribed the stirring words of the illustrious Senator—"Tell them to obey the laws and support the Constitution of the United States." Below the widow and about the centre of the cane, is a finely carved and very truthful figure of the President, holding in his right hand a sword of justice, and crushing beneath his heel the serpent. Beneath the figure, and forming a pedestal, are a pair of joined hands and implements of war, typical of the means necessary to save the Union, the hands signifying the union of parties, the implements, consisting of cannon, guns, drums, trumpets, &c., entwined with the stars and stripes, denoting the great motive power in crushing out the rebellion.

The Railroad. A meeting of the railroad Presidents with Secretary Stanton, on Thursday next, is to arrange for a uniform and cheaper rate of charges for transportation of troops and munitions of war. The reply of the Secretary to a resolution of the House, giving the amount of payments to the different railroads in the country, has called the attention of Congress to this subject, and one road will not hereafter be permitted to outcharge another.

Burning an Australian Gold Ship. The loss of the gold ship Empress of the Seas, by fire, shortly after her departure from Melbourne for Liverpool, was telegraphically reported morning from Alexandria—old news.

A man exonerated himself for marrying by saying that his friends declared he drank too much for a single man. No doubt honesty is the best of policy, but those who do honest things, merely because they think it good policy are not honest.

W. BODENHAMER, M. D., OF NEW YORK CITY. Native born in Pittsburgh, with a usual degree in Medicine from the Medical and Surgical College of Pennsylvania, Philadelphia, Pa. He has practiced the various Chronic Diseases of the Women, Rheumatism, &c. His rooms are at the MONROE Hotel, where he may be seen at all hours from 10 o'clock a. m. to 10 o'clock p. m. daily. His office is at the corner of 10th and 11th streets.
