all experience proves that, unless they are reached, cure is impossible. And in this respect, diseases of the lungs are not dif-

indicine can reach the affected parts, and all experience process that, unless they are reached, cure is impossible. And in this respect, diseases of the langs are not different from those of other parts. We could not cure even a simple chronic opthalmia. The advantage, then, which I claim for inhalation is that it enables me in the most simple and direct manner to apply any medicine I wish to use directly to the discusse medicines inhaled act not only on the blood than the same medicines within the langs, but also more powerfully upon the blood than the same medicines would if given by the stomach. It combines all the advantages of a local and a constitutional treatment, and sums icines would if given by the stomach. It combines all the advantages of a local and a constitutional treatment, and sums up all that science has yet discovered for

that it was not the disease which was in-surable, but the treatment which was false. The effect was to cut off pretty generally he wholesale use of nostrims by the stomach, and turn the attention of rational nethod of treatment. What was the con-sequence? Why, sir, within three years rom my introduction of this system and ny exposure of the old fallacies, the mor-ality from consumption in the city of New i erk had diminished thirty per cent., being a salvation of more than one thous-turd lines a year! These facts are on re-ord in the City Inspector's office, where hey are made un weakly from the city of sofice, where they are made un weakly from the sector of the old fallacies, the mor-they are made un weakly from the thous-they are made un weakly from the they are they are made un weakly from the they are made un weakly from they are they are made un weakly from the they are they are made un weakly from they are they are made un weakly from the they are they are made un weakly from the they are they are
