The fortifications of Yorktown extend in a line from river to river—of seven miles —and are of the most formidable charac- ter—the earthworks are from thirty to for- ty feet in heighth—and surrounded by a moat of water sufficient depth to drown: "the ruthless invader," however our po- sition will likely overcome this little dif- ficulty. General McClellan is in the ad- vance with Berdan's Sharp Shooters—the latter are on picket duty, and invariably pick off with their telescopic rifles any reb- el scoundrel who has the presumption to ahow his cranium above their entrench- ments. I have heard several speak about a certain member of the Sharp Shooters who has twenty seven notches in his rifle- stock, (a progressive age truly.) Severe firing was heard in the direction of York- town to-day, and I have aince learned that it was one of our artillery companies (Howe's) who captured a rebel battery, of one gun, but at a dear cost, for there are only four or five who are not eithersevere ly wounded or killed.
