In regard to Bromehitis, Asithuma, Cen-sumption, discusse which are so fatally inter-esting to a large portion of mankind, and evident-ly on the increase in the United states of Americas it is desirable that correct idlers should exist so far as the present advanced condition of medical science can furnish them. We know that in all diseases a timely applica-tion of rational remedies is more than half the battle, and the aphorism which tesches that " pre-vention is better than a oure" applies with pe-cular force to the case of Consumption, which, if once FIRMLY established, rarely, if erer, gives way, even in the most skilful treatment and the most sedulous care. Let all, therefore, who have reason to appre-hend the evidence of the seeds of the disease (scra-fulous disthesis) in the invelves or thair culdren, not fail to obtain such sultary advice, with rele-ronce to the regulation of their diet and the pre-evation of their health, as my long experienco enables me to give them. Positively no fee for examination of the Choet and professional advice. jy19
