THE ANDREWS PATENT PIPE. (PATENTED JANUARY 21, 1862.) prove its incomparable superiority to any pipe now is use. It may be smoked without any deterious or unpleasant effects, as the oil of to-bacco is not drawn; into the mouth, and the tongue does not become furred or coated from inhaling its poisonous properties. The bowl is made of the finest Devonshire clay, and gives to the to-bacco a peculiarly pleasant fragrance. The to-bacco canso become moid, as in ordinary Pipes, because the drip beneath receives the saliva that insensibly escapes into the stem; hence the pipe never becomes offensively rank, and the breath of the smoker does not proclaim to every one he meets that he has been "indulging in a pipe."

When the bowl becomes closged, or the drip beneath requires cleansing, the pipe may be taken apart by removing the rim. The clay bowl may at any time be re tored to its original whiteness by burning in the fire, (first drying it thoroughly) or a new bowl may be procured of the dealer.
