THE PEACE PROPOSITIONS. Our readers have read the remarkable revalation of John Wesley Greene, pub lished in yesterday's paper, and have probably paid no further attention to its statements. The story itself is well told, by explosions of steamboat boilers since certain; but the people of the United the benefit arising from that law, though States are so shamefully imposed upon by much depends upon the judgment and sensation telegrams upon public ques efficiency of the officers appointed to carry tions that they are not disposed to believe it into effect. We now have the statement of Greene, to which he has sworn, that he, in person. waited upon the President and his Cabinet with propositions—not merely from important Southern men, but from the rebel President himself. His visit to Washington occurred early in November, and in stead of it being announced by the newsmongers about the Capital, everything like it was positively and persistently denied. "No overtures have been made," the Administration organs persisted in stating but the publication of Greene's revelation has compelled them to do more than simply deny. The Washington Chronicle, the Administration organ, noicing Greene's affidavit, now says that "on inquiry it is ascertained that a man calling himself Greene, and professing to reside in Pittsburgh, Pa., called upon the President of the United States, some time in November, and stated to him that he (Greene) had two interviews with Jeff Davis, at Richmond, &c. ' The President did not believe Greene's story, and, the editor adds, that the whole thing is ere this time, become dull, insipid and "moonshine." It says the same thing in stale, both to the aditor and readers of the relation to the propositions lately said to have been presented to the powers at

Washington by Mr. Barney, of Baltimore. It will strike the reader here as being peculiar that the Administration organs have been so mute upon the presentation of supplies, except clothing, are arriving of these peace proposals, not noticing in large quantities. Woodbury, proceeded to the river bank, where, with infantry supports, an attempt was made to throw three bridges across the riverone at the point where the railroad bridge formerly crossed, and two more opposite the city but nearer Falmouth. A dull haze obscured the movement that for a time it was not discovered by the rebel pickets. The pontooniers succeeded in partially constructing the bridges, when the rebels suddenly opened a very brisk and deadly fire of musketry from along the banks of the river and the windows of the houses, compelling a cessation of the work.
