 HOUT DAND'S ITERMAN BITTERS.
 From J. Newton Bround, D. D., Editor of the Englicity of Religious Knowledge.
 Although not disposed to favor or recommend
 Patent Middlines in Ameral, through distruct of their infredients and effects; I yet know of no sufficient factors in the favor of the bound of the second state of any simplify preparation in the hope to be to indu-thus contribute to the benefit of others. I do this the more freadily in regard to Hoof-land's German Bitter, prepared by Dr. C. M. Jacksoni of this city, because I was prejudiced grainst them for many years, ander the impres-lion that they were chiefly an alcoholic mixture, I am indebted to my friend. Robert Shoemaker, Eas, don'the removal of this prejudice by proper ests, and for encoursignment to try them, when afferingfrom great and long continued debility. The usefit three bottles of these Bitters, at the eoginning of the present year, was followed by wrident firster, and restormion to a degree of podily and mental vigor which I had not leit for ix months before, and had almost depaired of re-laning to the usefit for and my friend for investing into this use of the mental the output of the present in the data of the start in the before, and had almost depaired of re-laning to the inster thank Ged and my friend for in working the to the use of the to the output of the present in the start in the to the use of the use of the start of the present in the start of the integration to the use of the use of the start of the present in the start of the present is the start of the present in the start of the start of the present is the start of the sta
