PHILADRIPHIA, August 23d, 1862.

Mesers, Jones & Evans, —Well, gontlemen, your Hoofland's German Bitters has sayed my life, There is no mistake in this. It is vouched for by numbers of my comrades, some of whose names are appended, and who were fully cognizant of all the circumstances of my case I am, and have been for the last four years, a member of obtaminated of the last four years, a member of obtaminated of Capt. R. B. Ayres. Through the exposure attendant upon my arduous duties, I was attacked in Rovember lest with inflamation of the lungs, and was for seventy two days in the hospital. This was followed by great debility, heightened by an attack of dysentery. I was then removed from the White House and sont to this city on board tho steamer "State of Usine," from which I landed on the 2th of June. Since that time I have been about as low as any one could be and still retain a spark of vitality. For a week or more I was carcely able to swallow anything, and if I did force a mored down, it was immediately thrown up again. or more I was caroely able to swallow anything, and if I did force a morsel down, it was immediately thrown up again.

I could not even keep a glass of water on my stomach. Life could not last under these circumstances and, accordingly the physiciahs who wad been working fain hilly, though unsuccessfully, to rescue me from the grasp of the dread Archer, fryshly told me they could do no more for me, and, i yised me to see a clergyman, and to make such disp. without of my limited funds as best suited me. An equaintance who visited me at the hosgital, Mr. Tederick Steinbron, of 6th below Arob Street, adviged me as a forlorn hope, to try your Bitters and kindly procured a bottle, from the time I commenced taking them the chadow of death receded, and I am now, thank God for it, getting better. Though I have taken but two botes. I have gained 10 pounds, and feel sanguine of beling permitted to rejoin my wife and daughter, from whom I have Beard nothing for eighteen months; for gentleman, I am aloyal Virginian; 13 m the vieinity of Front Royal. To your invaluable Bitters I owe the glorious privilege of again clasping to my becom those who are dearest to me in life.

Very trally, yours, ISAAC MALONE.

We fully concur in the truth of the above statement, as we had despaired of seeing our comrade. Mr. Malone, restored to health.

DAILY POST

The Situation of Fort Sumter. From the Richmond Examiner, Aug. 21. We have not heard, either directly indirectly that Sumter has fallen, been de

patch published this morning, it is reasonable to be supposed that is much injured, has proved what was hitherto theory, that the heavy ordnance now used will do considerable injury to fortifications construct ed of any materials other than earth, even at the distance of three thousand yards Wagner, exposed during forty days to the whole artillery of the enemy, at only eight hundred paces, still holds its own, and it n danger only from the cannonade, would Are not, a new and untried article, but have stood the test of fifteen years trial by the Amerian public; and their reputation and sale, are not rivalled by any similar preparation.

The proprietors have thousands of Letters from the most eminent evidently last forever; while Sumter, casional assistance from scary monitors, suffers severely, and probably would have to already crumbled but for the sand bags with which its walls have been stregthen ed Sumter's walls are brick and concrete, sixteen feet thick; Wagner is a simist cannon shot by building them with blocks of solid granite enormous in mag-nitude. Yet the fire of a fleet pounded them to fragments at Sveaborg and Bom-ersund. Sebastopol was the the "labor of an age in piled stones;" but its siege, would not have lasted ten days had not land and of France, coatten months siege. and the lives of a hundred thousand men stream of cannon balls will destroy nything in the nature of stone, if long enough continued; but firing into a bank of earth they can render it only a little better protection for those behind it that it was before. Such works can only be taken as the earthworks of Sebastapol were finally taken—by approaching the trenches till they nearly touch the batteries, and then rushing in with an over whelming assault. But Sumter and Wag ner have no necessary connection with the ultimate result at Charleston. That city is on the land and until a fact on city is on the land, and until a fleet can clear the harbor, no effectual operations AND THE FRIENDS OF SOLDIERS can be commenced against it. Even if it should do so, we learn through the highest engineering authority of this country, that Beauregard can maintain himself against any force that has been, or is likely to b sent against him. If Morris Island should fall entirely into the hands of the enemy he may shut up Charleston as a port utry, but it will not enable him to take the

city while its defenders are determined to fight it out. Chattanooga and Knoxville. General Rosecrans is "marching on" to ome purpose. He has reached Chatta-100ga, the most important strategic point in the whole South after Vicksburg, and themometer ranging above ninety. at last accounts everything was going well with him General Bragg, it seems, has been superseded by General Joe Johnston, who will command in person the operations against General Rosscrans. It Johnston pursued his usual tactics, we will soon hear of his retreating to some heresy having been read, a motion was point further South. His only success made to accept the same and lost, 2 was when he retreated from Winchester to Bull Run in time to help Beauregard action the church sustain their pastor defeat McDowell. And since then he has done nothing else but retreat. He retreated when General McClellan marched upon Manassas, he evacuated Yorktown, he retired from Williamsburg, and would have given up Richmond, only, for wounded at Fair Oaks and General Lee was put in his place. The latter general brew how to advance as well as retreat that on one conserve Mr. King, the exknew how to advance as well as retreat, as his campaigns against Pope, Burnside. and Hooker proved. Nor has Johnston done any better for the rebels in the West. He has lest them Vicksburg and Port Hudson; he was not on hand to fight Grant: he retreated before Sherman; short, his whole military career has been a conspicuous failure. So we feel tolerably well assured that Rosecrans has not much to fear from him.

We wish we could feel as well assured of

the success of General Burnside a march upon Knoxville. Not that we think the expedition a difficult one, in a military point of view, for it is not. The rebel soldiers under General Buckner are few and disheartened, while Eastern Tennes-see will be found full of friends, but we have no confidence in General Burnside. f it is possible to commit a blunder, he is the man for the "situation." There are the strongest reasons for believing that Burnside has not been in his right mind since his disaster at Fredericksburg. He certainly has not acted like a same man ince, and the administration must be

perhaps even this unfortunate general may blunder into a victory.

The importance of these operations cannot be overestimated. The capture of Chattanooga and the occupation of Eastern Tennessee will be as heavy a blow to the Confederacy as was the fall of Vicksburg. It will place all the great railroad lines at the mercy of the Union armies.—We do not see how it will be possible for the rabel government to keep a large arms. the rebel government to keep a large army together in Virginia with their communications to the gulf States cut. If Chatta Corner Smithfuld and Four form of the military hower of the rebellion be crippled beyond recuperation.—World.

THE DAILY POST-ADVANCED General Buell Corrects History at RATES. the Expense of Judge Holt. the Expense of Judge Holt. This characteristic letter from Major General Buell exposes a looseneess in making up reports that ought not to be allowed to exist in times like these. Official reports of our operations in the field are the only reliable data the historian will have, when he sums up the history of the rebellion :

"SARATOGA, August 5. "SIR: In the Official Gazette, on the 21st ult., I see a report of Judge Advocate General Holt, dated the 27th of March, relative to 'an expedition set on foot in April, 1862, under the authority and direction,' as the report says, 'of General O. M. Mitchell, the object of which is to destroy the communications on the Geor chattanoga.' The expedition was set on foot' under my authority, the plan was arranged between Mr. Andrews—whom I had had in employment from shortly after assuming command in Kentucky—and my chief of staff, Colonel James B Fry; and General Mitchell had nothing to do either with its conception or execution, except to furnish from his command the soldiers who took part in it. He was directed to send six: instead of that he sent twenty two. Had he conformed to the instructions given him it would have been better; the chances of success would have been greater, and in any event several lives would have been saved. The report speaks of the plan as an emanation of genius, and of the results which is stroyed, or evacuated; but, from the dis promised as "absolutely sublime." It may be proper, therefore, to say that this and may become untenable. The event statement is made for the sake of truth, and to call attention to the extravagant colors in which the article has been pre-

Hops. As the time has arrived when it must b interesting to the hop growers to know which receives the shot of a single battery, definitely the prospects of the growing crop, I take the liberty of making a few suggestions as well as stating a few facts as regards the position of the hop crop abroad. In England the highest estimate of yield is 150,000 bales against an annual consumption of 250,000 bales. In Ger the general public of this continent the facts has the air of novelty; but the events of the Crimean war have caused it to be quite familiarly known in Europe. The Czar Nicholas faucied that he discovered the means of rendering walls able to resist cannon shot by heart and the means of rendering walls able to resist cannon shot by heart and the means of rendering walls able to resist cannon shot by heart and the means of rendering walls able to resist cannon shot by heart and the means of rendering walls able to resist cannon shot by heart and the means of rendering walls able to resist cannon shot by heart and the means of rendering walls able to resist cannon shot by heart and the means of rendering walls able to resist cannon shot by heart and the rendering walls are resisted to the continent the aby be less than their own requirements, so that England, particularly, must rely upon this country for very large quantities to meet her deficiency. Having recently better enabled to give the continent of the properties of the continent the state of the properties of the other source. The quantity of American hops of 1862 shipped there during the ason has reached the enormous amoun of 39,000 bales. According to my last advices there were but some 6000 bale unsold, more than two thirds of which are of very poor quality. The prejudice that existed against our hops in that country has in a great measure been removed, and as there is now no revenue duty on for eign hops. I am satisfied we can success ally, with proper care and attention, com pete with them in the production of that article. I would, therefore, urge upon you the necessity of picking more care fully and drying the hops in such a man-ner as to give them a full green color, and letting them lie a sufficient length of time to let all heat and steam pass off, thus rendering them safer to ship and retain the fine properties they naturally possess. Being in correspondence with the largest dealers and brewers of Europe, I shall be prepared at all times to furnish you with he most reliable information in regard to the article.

Your obedient servant,

OFFICE OF THE DAILY POST, Thursday, Aug. 27th, 1863. Remarks-The weather since the steady nins of Tuesday has been very pleasant; giving great relief to persons who have been suffering on account of the excessive warm weather usiness generally speaking was dull in all the various departments of trade. The sales were w and far between and confined to small lots to meet the wants of the home trade. The dull season, however, is pretty near over and we hope in a short time to be able to report heavy transactions and plenty of them. Hay—The market yesterday was very firm and prices further advanced, the receipts being barely sufficient t meet the wants of consumers. Bacon-Holder were firm with a good demand. The sales to the rade were to a fair extent. The stock in first hands is not large. The late spell of warm weathwas severe on holders of inferior lots. Flour-We have no change to notice as regards price demand. There was no demand for export.

There is a good supply in first hands. Butter was in moderate request with a good busines being transacted in lets to meet the wants of the Flour—The sales at present are confined to smale: lats, to meet the wants of the home trade. Pricey have undergone no change for some time rat. The current rates were Extra(\$505.50; Extra F.mily \$5.75465 The stock in first hands is not large. Upon the whole the past weeks war one of the dullest of the season.

Hay has advanced: sales 35 loads at scales at \$32083

Groceries—The market was moderately firm for certain descriptions. Sugar was firm and advanced. The sales were as follows:

Sugar—Sales 20 hhds Orleans, 130: 15 do Porto Rice, 122/e; 25 do Cuba 1224; Crushed, 25 do Cuba 1254; Coffee "A" 20 bbls 15c; 22 bbls "B" coffee 145/20143/c.

Bacon continues firm with a good demand for various sized lotato meet the wante of the home trade. Among the sales made were the following: 8,000 fbs shoulders, 53/@6: 2,000 fbs sides, 63/c; plain hams, 13,000 fbs, 94/@93/c; 10,000 fbs S.C. hams at 13@133/c

Grain—The week past was one of the dullest of the season. We never witnessed less disposition to other at than at the present time. In the absence of large sies we give the nominal rates, viz; Wheat, small sales of red from wagon at 105; white, \$1 10. Corn, with small sales from first hands, 70c: store 75c. Oats do, 55@600. Ryenominal at 80c with more sellers than buyers. Bar'ey was not inquired for and we omit the figures.

PHILADELPHIA CATTLE MARKET. The arrivals and sales of beef cattle at the Avenue Drove Yard are moderate this week, reaching about 1,600 head.

There is a good demand but prices remain about the same as last quoted. Extra cattle would bring better prices. Good Western and Pennsylvania steers are selling at from 91/6010c; fair do 81/60 and common at from 667c, as to condition. dition.

The market closed very firm and all the stock sold within the above range of prices.
