Al hough not disposed to favor or recommend Patent medicines in general, through distrust of their ingredients and effects; I yet know of no sufficient reasons why a man may not testify the benefit he being the heres himself to have received from any simple proparation, in the hope that he may thus contribute to the benefit of chers. I do this more realily in regard to Hoodland's German Bitters, propared by Dr. C. M. Juckson, of this city, because I was prejudiced against them for many years, under the impression that they were catefly an alcoholic mixture. I am indobted to my friend Robert Shoemaker, Esq. for the removal of this prejudice by proper tests, and for encouragement to try them, when suffering from great and long continued doblity. The use of the pre-ent year, was followed by evident relievand restoration to a degree of bodily and mental vigor which I had not felt for six months before, and had almost despaired of regaining. I therefore thank God and my friend for directing me to the use of tame.

ATTENTION SOLDIERS, AND THE FRIENDS OF SOLDIERS

We call the attention of all caving relations of friends in the army to the fact that "HOOF-LAND'S German Bitters" will once nine tenths of the disease induced by exposures and privations incident to camp life. In the lists, published almost daily in the newspapers, on the arrival of the slock, it will be noticed that a very large proportion are suffering from debility. Every case of that kind can be readily cured by Hoofland's Gorman Ritters. We have no hesitation in stating that, if thuse Bitters were freely used among our soldiers hundreds of lives might be saved, that otherwise would be lost

The proprietors are daily receiving thankful letters from sufferers in the army and hespitals, who have been residered to health by the use of these Bitters sent to them by their friends.

PARIS, December 3. The Roman question proves, it would eem, a serious Mexican difficulty. The retirement of the archbishop of Mexico rom the triumvirate, which is announced in to day's Moniteur, and was announced in last night's Patrie, is undoubtedly the signal for a struggle between the conserva-INTERNATIONAL EXHIBITION, LONDON, 1862

A fact which spoaks louder than words of the tion of the archduke Maximilian renders them more exigeants in Mexico than they even are in Rome, Madrid, or in the west of France. The archduke is, therefore, in a hesitating frame of mind. He has recently, I understand, notified to the Emperor that he must have other guarantees for the security of the Mexican throne than the Emperor is willing to allow. The visit of his imperial highness to Compeigne is no longer spoken of, and the general feeling is that Marshal Forey's conquest will be annexed to the empire of the

Scarcity of Horses. Gen. HALLECK'S statement of the num. per of cavalry horses, says the Boston Advertiser, destroyed by our army will strike everybody with astonishment. A remoont for the whole service once in two months is the rate at which our horses are used up, by want of skill and often culpable neglect of the animals. Four hundred and thirty-five thousand horses will be needed for the coming year if the evil remains unchecked. The enormous waste of horses was one of the points which was urged quite early, we believe, by those who wished to see the volunteer cavalry force kept within narrow limits. The admirable service done by this force will outweigh its immense and needless expense in the opinion of the country. The immense consumption of horses, however, is an evil which is felt outside the army or the Treasury. The stock-breeders declare that if it goes on it will permanently injure the breed of horses in the country. The horses of mature age are being taken up by the Government so fast that young horses are put to work too dred and thirty five thousand horses will The Fremium for machine work.
