

The Daily Post.

PITTSBURGH: MONDAY MORNING, MARCH 7, 1864.

POLITICAL AND MILITARY ACHIEVEMENTS.

If the Administration of Mr. Lincoln has proven itself criminally incompetent to suppress treason against our Government, it has, on the contrary, exhibited a vigilance and industry in carrying elections, worthy of the most expert and reckless ballot-box stuffers in the country.

We now very much doubt, indeed, whether FRANKLIN STEVENS or HARRY WYSTER DAVIS, could improve upon the Administration's mode of conducting elections. Stevens' idea used to be, when beaten at the polls, was to treat an election as if it had not taken place, which was certainly no success.

The Democrats, however, had a neck of contention, and they always succeeded in convincing him of the propriety of submitting to the result. Davis and his "plugs" in Baltimore, have a more summary mode of gaining an election, they merely crowd the polls with burly ruffians, well organized by secret appliances.

These persons do not always remain content with merely depriving the citizen of his vote, but frequently extend their operations to his pocket-book also. But the contractors under the Administration, who have Mr. LINCOLN in training for a re-nomination, do not stoop to the petty game of the Baltimore plugs. There is no necessity for it. These plotters and opulent gentlemen are no common individuals; they do not do things in the dark and in a roundabout way.

They get the President to proclaim martial law in Kentucky, Maryland and Delaware, in order to secure the election of their candidate; they come the "ten per cent" dodge in Louisiana, under Gen. BANKS, to have that State under their control; they send their armies to Florida for the same purpose, which results in the massacre of hundreds of our soldiers; where elections are pending, our armies are depleted in order to secure Administration triumphs at the polls. Thus it will be seen, that no matter how stupid and negligent the Administration has been in putting down the loyal States.

An election takes place to-morrow in New Hampshire, for State officers, and the Administration, at Washington, is even more shameless than it was last year, in its efforts to carry it. The fourth regiment of that State has been furloughed, on condition they vote the Abolition ticket; and we learn from one of the Pittsburgh Commercial's private dispatches from Washington, that "fifteen hundred soldiers" left that city last week, to swell the Abolition majority in New Hampshire.

The reader will remember, that when the War Department—about eighteen months ago—called for soldiers, Gen. ANSON, of Massachusetts, answered that if the President would but issue a proclamation of emancipation, New England would literally "swarm with volunteers." He was speaking in a peevish sense; the proclamation was indeed issued, but the only swarming we have seen, in consequence, is the rushing back from the army, on furlough, to overawe and intimidate the people. And all this under an Administration ushered into existence upon a platform of free speech and free men!

WE UNDERSTAND says the World that the friends of General Fremont have determined to put him in the field as a Presidential candidate without reference to the Baltimore Republican Convention, which is to meet next June. Already the German Republicans have taken the lead, and their newspapers have put his name at the head of their columns. A mass convention is to be held at Cleveland on the tenth of May next to give the pathfinder a formal nomination. This is an important movement in many respects, and may force Fremont upon the Republican convention, of the LINCOLN and CHASE results, as it may in killing them both off as Presidential candidates.

A NATIONAL MENAGERIE. The New York World remarks that the camels imported for the Government six years ago, and since kept near the Tejon reservation on the plains, have increased, from fifteen to thirty-seven. This is the only increase, except of debt and taxation that has been reported under Government management. We hope the camels will continue to increase, so that the Administration can have something to boast of. It would not be surprising if it some day wake up to the fact that it has also an elephant on its hands.

A European Belle.—A letter from the continent describing the Countess of Hatfield, proceeds. "She owns more Oriental slaves than any woman in Europe, and more jewels, and is about to give half to her daughter-in-law. One of her morning dresses is a Turkish fabric of silk and pure gold; its pattern, small plain leaves inclosed in stripes. The dress is so heavy and thick that it will literally stand alone. The underdress and trimming about the neck are of gold lace, and it is negligently fastened at the waist by a golden cord and tassel. Another morning robe is of black material, resembling moire antique with plain stripes of gold woven. It is mentioned that the Countess's special abhorrence is an embroidered skirt, and her newest dinner-dress is a velvet, ornamented with gold.
