CURED.

Below will be found a certificate from one of the most respectable citizens of Wilkins township in regard to Dr. Keyser's Lindsay' Blood Searcher. regard to Dr. Keyser's Linuxy

The Doctor's certificates are within reach, and no one need be develved in regard to his preparations.

DR. GRO. H. KEYSER:—I became affected with Piles about twenty years ago, and every year they were growing worse, so as to trouble me very much, so much so at times as to unfit me for work. Sometimes I was so bad that I could | not do anything on account of them, they came

out on me as large as a hickory and That ... WIE GREAETST VARIETY OF ELEGANT AND CHEAP LL PAPER.

bought one bottle and took it home with me and used it secording to your directions. I then call ed to see you again, when you said I could no BISSELL'S BLOCK. expect much benefit from one bottle. I bought it on, one/bottle at a time, until I had used five bottles: After this quantity had been used, I was entirely well of the Piles, which had tortured me for twenty years. In other respects my health is improved, and I am as well as could be expected for one of my age, being sixty years past. I have been well now for six months, and there is noappearance of a return of the disease; I can do any kind of farming work now without the Piles coming down and hurting me. I can my27

The CALL THE ATTENTION of buyers to his stock of Goods, which has been selected with great care and contains all the newest styles of Goods to be found in first-classe houses. Clent's wishing a snit of clothes made to order will please call and examine our goods and prices. Also, a full and complete stock of FURNISHING GOODS.

TUNNELING LAKE MICHI.

The Chicago Training yes the following graphic account of a recent visit to the tunnel being constructed under Lake Michigan for the purpose of supplying the Chicago with the chicago with purpose of supplying the chicago with the chicago with the chicago with the chicago wit plying the City of Chicago with pure

On the shore of the lake, near Chicago avenue, and on the grounds of the present Water Works, is a very unprea shed of limited dimensions. Going a shed of limited dimensions. Going a little closer, the visitor sees a small thing by nine inclosure, in which is a deep hole, around the brim of which are two or threatment and the bring of which are wo or three workmen ! This is all the exterior sign of a gigantic, work which has already convulsed the city, set our wise men together by the ears, laid in open to a debt of over three hundred thousand dollars, and worse than all is a matricial process involve than all is thousand dollars, and worse than all la!

a matricial process, involving the disentation boweling of our common mother rearth who, if she survives the process, will do more than it ordinarily expected of mothers. But look down that bore will you see nothing but a wire rone. Below mothers. But note down that bore in you see nothing but a wige rope, Below, all is dark. No, there is a flash of light like the beaming of a single star, issuing forth from that caverdous depth. Bye and hya, the buckets comes to the ton, and you are invited to start is and. of each day alone, will urge the Patriot and Philanthropist.

We solicit your donations or contributions of such articles as will adorn and render attractive the Department under our charge, which is of ample extent and where derected the analyses are and you are invited top, and you are invited top and top and to top, and you are invited top top and tower to and tower to a subject top, and you are invited top top and tower to a subject top, and you are invited top and tower to a subject top, and you are invited top and tower to and tower to a subject top, and you are invited top and tower to a subject top. the sinking process at last ceases, the bottom is reached, and you step out on terra firma instead of terra inferria. And

depth of seventy-seven feet, has been

reached, and yet there is another gulf below, but that is bridged over, and you are on the level of the lake tunnel! Looking horizontally, you see in the dim light a long, and what appears an almost interminable vista extending in each direction—nearly due east and west. Yet the distance is but short. Fifty feet landward takes you to the extending the contract of Fifty feet landward takes you to the extremity of the eastern cut, where a seat is found from which you may watch and ruminate at your leisure. A light glimmers at the other end, and by its flicker you may discern the forms of men moving as if wielding the pick and handling the shovel. This length has been run for a double purpose; it will afford stabling for the mules, and room to sight the instruments which will determine the level and direction of the tunnel. This is rooled with timbers. On the other side of the shaft, is the tunnel proper. As yet only forty-eight feet of proper. As yet only forty-eight feet of its length of two miles, has been due, out, and about three-fourths of this is bricked up on a cylinder of five feet in-ternal diameter. In one place men are engaged in digging out the hard, stiff clay, which it so, dry that scarcely as speck of water is seen, and the clothes of the visitor not wetted by a single drop from the root; in another place the workmen are laying the bricks in cement, effectually shutting out everything ment, enecusary snuturing out everything in the shape of moisture, making it not only water, but air tight. These follow the other gang at a respectable distance, keeping a few feet behind them all the

There is much to admire in the manner in which the work is so far executed.
Before being let down, the bricks are sill inspected singly, and the bad ones rejected. They are then set carefully, not jected. They are then set carefully, not only with reference to firmness, but to evenness. On the face the work is perfectly even, so as to prevent as little resistance to the flow of water as possible. The junction of the shaft with the tunnel is quite a problem in bricklaying, as the elliptic corner formed at the meeting is itself rounded upward for the reason just mentioned. The bricks hitherto used have been brought from Milwaukee, but bonds and securities, and counted the cash, and have been brought from Milwaukee, hut preparations north a, hrishyard are about ready made above ground, and sometime in the present week they will commence the manufacture of bricks above ground out of the wery excellent (clay taken from peneath the lake, that taken from peneath the lake, that taken from peneath the lake, that the overcome; the workmen have penetrated through the sandwed which obstructed their course, and albis now clear. Next week the track will be laid in the tunnel for the more speedy transporta-tion of bricks and chy, and the air pumps will be put in for ventilation. Yet at will be put in for ventuation. Yevath present there seems no need for that, in the air is as pure there as aboys ground. The outer crib will be finished in about three weeks, and will the immediately towed out two miles and work. towed out two miles and sunt. They expect to begin operations from the eastern end by the latter part of July.

It is a stupendous undertaking but will be done. Two miles out under it the lake, and then up again through the dear blue water—thereit is as pure as crystal—is no every day diving feat.
