### LOCAL INTELLIGENCE.

WEDNESDAY MORNING, AUGUST 10, 1864. Oil Discoveries .- The frequent important discoveries made of Oil Wells, and these yielding a large quantity, will doubtless add a new stimulus to that lucrative business, which has contributed so much wealth to this city and surroundings. Discoveries have been made in places where oil was never suspected to be, and it emanates in such large quantities and such refined quality, that we can easily make large fortunes by putting the mells in operation. A recent discovery was made by Capt. James Saint, on his premises at Sharpsburgh, in a manner truly extraordinary. The Captain observed one day oil arising to the surface of the water, near the edge, and in order to discover the source of the precious substance prepared tively slight sum of money, that the city may five small basins, into which the oil flowed. In six days, he took up from the basins four barrela.of oil, but the sudden rise of the river overflowing the basins, operations were suspended. reddish color, and burns with great brilliancy

at 300 barrels per day. This is very encouraging news for our stockholders. If the new ging news for our stocknowers. In the new aystem which was recently proposed in England be adopted, that of using petrofeum as a substant men have now engaged in the business, and their efforts are for the most part success.

The Venango Oil Market -The Oil Oity Register of Saturday says: The market has The Enrollment, The enrollment of the Charleston December 1 ruled very dull for the past week, and the tenheard of small sales as low as \$7,50 per bbl. at ailed to purchase their supply within the past two weeks, will have to pay higher prices in the future. We give as the ruling quotations at the weils \$8 per barrel. The stock on hand and hope we may have the pleasure of another has accumulated considerably. The daily prohas accumulated considearbly. The daily production is fair. Great excitement exists in

large heavy loads along the wharf, we would urge that the work be put in execution as quick as possible. Hitherto the wharf presented a miserable appearance, especially if the rain happened to fall in any quantity, when the wholes of the wagons went nearly axis deep in mud, rendering it nearly impossible for the horses to move, or the carmen to perform their horses to move, or the carmen to perform their ordinary business. This caused a great deal of as possible. Hitherto the wharf presented a ordinary business. This caused a great deal of annoyance, but the restoration of the wharf has been taken in hands, a large sum of money has been appropriated for that purpose, and we will soon see it in a condition entirely renovated land mproved.

The Passenger Railways .-- Frequent complaints have been brought against these railways for some time past, and the complaints have become so frequent and distressing of late, that we would request the authorities to take the matter on hands. Redress in this case is an important matter, and the evil should be an important matter, and the evil should be | JOSLPH METER.....ANTHONY RETER violated their contracts, according to the information we receive from complainants, and have desisted from running as often as the accommodation of the traveling community would require, and moreover are very apt to charge than the fee which is allotted to them by the city authorities for conveying a passenger This, if true, is a direct violation of contract, and the companies should consider the matter and dojustice to the city. It would certainly be provoking for the city to be riddled with iron rails to the annoyance of other travel, and not obtain the least good from it.

The Sharpsburgh Homicide. - We have already notified our readers concerning the death of a lad named Purcell, who it appears iled from the effects of blows received at the hands of Joseph Samuels, and two others. The Coroner left this city to hold an inquest over the body of the deccased, but the attending phystances. The jury being unable to agree upon a verdict, the inquest was adjourned until Saturday afternoon at 2 o'clock. All Quiet .- Our city has resumed its ordinary feature, and everything progresses as heretofore, without the slightest danger being apprehended from the side of the rebels. I cens that all apprehension at present would be out of place, as everything is again in perfect security. It has been reported that only very few rebels are at this side of the Potomac, we can well afford to keep quiet. Never emy might make his appearance, the best policy we could pursue, would be to keep on the

Excitement Along the River.-It ap. pears that the most intense excitement prevaiss along the Ohio river, and numerous reperts were spread among the inhabitants of the arrivals of rebels. The steamer Petrolio No. 2, which arrived at Wheeling, early Saturday morning from Parkersburg, brought the news of a big scare among the inhabitants. Hundreds of refugees were pouring into Sisterville, St. Marys, and other places, bringing with them their horses, cattle and all their personal effects.

Emergency Artillery-Lieut. Howard Morton, yesterday commenced to recruit men for an artillery company, organized for the purpose of defense during the present crisis. General Rowley has everything in readiness, and guns and equipments will be delivered to the ompany as soon as it shall be completely filled Lieut, Morton is an experienced officer, and it would be advisable for all young men to Join this artillery company of a well tried soldier in preference to any other.

THE POST---PITTSBURGH, The Bounty Fund. Contrary to the general expectation if is now discovered that not the men, but the money is deficient in raising a sufficient number of men to complete our quota under the last east for 500,000 men. We would not venture to say, that if we had a sufficient sum of bounty indoes, the requisite number of volunteers, would be furnished ere the draft come in to finish the business, but we will state that were it not for the insufficiency.

Some of our Wards, it is true, are in a position to congratulate themselves on their good fortune in having nearly succeeded in averting the draft, but the greater part are yet in the beginning. They should all supply money to raise a bounty fund sufficient to pay all the voluneers who wish to be mustered into the service, for this is the only measure through which they may hope to meet with success. Several volunteers have been sworn into the service, and in cash. We are informed that there is at present a squad of 40 men waiting to be paid their bounty. They will be paid without a doubt them at once, and proceed immediately to an column down the Shenandoah Valley. swer the calls of the many others, who are coming in daily?
