In the year 1856 Mr. Mathews first prepared the VENETIAN HAIR DYE; since that time it has been used by thousands, and in no instance has it failed to give entire satisfaction.

The VENETIAN DYE is the cheapest in the world. Its price is only Fifty cents, and each bottle contains double the quantity of dye in these usually sold for \$1.

The VENETIAN DYE is warranted not to injure the hair or scalp in the slightest degree.

The VENETIAN DYE works with rapidity and certainty, the hair requiring no preparation whatever.

The VENETIAN DYE produces any shade that may be desired—one that will notise, crock or wash out—oue that is as permanent as the hair itself. For sale by all druggists. Price 50 cents.

kerosene lamps immediately took fire, and at one time there was great danger of many being consumed by the fast spreading flames; but fortunately all esaped, and not a man, woman, nor child was scriously hurt. Such confusion was never before witnessed in this city. Men calling for their wives, wives for their husbands, mothers for their children and children for their mothers-all was confusion. Just at this time two cages, which had been placed together for the purpose of forming the den of wild beasts, which Prof. Sears enters during the exhibition, became [separated, and, the back door being open, out leaped a huge lioness, then arose the cry "A lion out." Then there was confusion werse confounded, and a stampede took place equaled only by the stampede of the abtion Congressmen from Bull's Run. The keeper of the lion caught it around the neck, another man belonging to the concern jumped into the cage and threw the leopard (which being in the same cage with the lion, was about to escape) down in a corner and held it while the

bystanders closed the cage. The lion was put back into the cage and all was quiet, "Nobody hurt."

The loss of the proprietor is very heavy—the canvass is an entire loss. A Rebel Iron-Plated Ram at Sea under the Union Flag. The latest European advices received by the Hibernian and City of London inform us that an iron-plated steam war ram, hoisting the United States flag, was seen passing the Isle of Wight on the afternoon of the 26th of July, steer in the westward. We record this ing to the westward. We regard this magnificent demonstration ever beheld the like in numbers or enthusiasm. Even that this can be the case or that any such felicitous results can come from the United States Government has no The United States Government has no ram of any description employed in its service off the coasts of Europe or on the Atlantic; whereas the rebel naval propresentatives in the Old Weell skimmed off, and capital is required to mine successfully. They think that Idaho will prove equally as sich as Coltrado, and that the same machinery representatives in the Old World have, as every body knows, traded in vessels of this description, from Laird's yard, at Birkenhead, England, to Bordeaux,

in france, and thence away to the shores of the Bosphorus.

The steam ram which passed the Isle of Wight on the 26th of July was, in all likelihood, a rebel ram, notwithstanding the fact that she displayed the Union dag. This has, no doubt, been done in order to enable her to escape interruption on the part of our cruisers. If she starting for California and Oregon, and were a rebel war vessel she must be near our coast by this time, and it behooves the port officers and naval authorities at New York, Boston, Philadelphia, Portland, and the mouth of the James river to keep a sharp lookout for her. An iron-plated rebel ram could inflict the most serious damage upon our city in a single night. A dashing S. F.
