New Difficulties Anticipated,—It is now reported that more difficulties between the coal diggers and the mining companies are imminate, which it is thought will sooner or later terminate in a strike on the part of the former. of these difficulties, but judging from appearan cel they are of a serious nature. Notwithwas said the market was filled, some of our manufactories were forced to suspend work on last Friday because of their not being able to obtain their usual sapply of coal. This is truly stonishing, and will, no doubt, appear in this total large portion of our readers. If is all fault to determine whose fault it is that these Inconveniencies occur, or why some of our nittizens should be deprived of the necessary supply of fuel to carry on their works. If our mines doubtless have a sufficient quantity of the best soal in the world to answer all purposes, but as it is, it seems that although it only requires flittle energy on our part to develop the immens ces hidden beneath our soil, our supply is yet but scanty. It cannot be otherwise when s of our manufactories were forced to suspend business, and when the entire community ompelled to pay from sixteen to twenty cen per bushel. It is truly amazing to think how long the community have borne with these difficulties without even a word of complaint, but if things continue much longer in their present condition they will at length be forced to serve their own interests. Coal must be rendered cheaper, and we must have a supply of it to suffice at least for our own home consumption

Snow.-Snow tell in our city and vicinity or Seturday last, and continued during the greater part of the day at various intervals. Notwithstanding this fact the ground was not covered with show during any portion of the day, as the flakes melted away as soon as they reached the ground. The fall was prefty heavy, and were it not for the fact that the streets were covere togeth mud caused by the recent raine, which immediately absorbed the anow, the wintry aspect of the city would have been more apparent. The atmosphere, however, was admir-ably purified, and it was highly pleasing to inhale the cool, bracing, invigorating air of yester day and Saturday night. Yesterday the air was ar and bright and was free from dust and smoke, so that it might be called the finest day we had this season. No Shoday afternoon we had another slight fall of snow.

In avery-business, or profession, indeed, in every department of science or skill, there is sliva; a some scknowledged head—some one who stands, out sin bold reliable among his fellows, as a sort of feeder. In the study and treatment of dealness and on tarrh, as a special diseases, Dr. E. B. LIGHTHIFEL, of this city, occupies just the position above described. He has devoted years of labor to this speciality, and is now reaping the reward of his industry. The editorial columns of the Tribuse of a recent take, bear witness to the Doutor's success in this department of medicine. We quote the paragraph:

"Culk op a Dray Mitte.—Louis Loewing stein a lad fourier years of see, born in Germany, come to this city when he was about two years old. Soon after his arrival here he was taken sick and lost his hearing. Hy degrees he became first deal and then dumb. For mearly ten years he was a muter unable to hear the loudest voice or to articulate a word. About one year ago he was placed by his parents in the hands of Dr. Lighthill, who has be far succeeded in restoring to him his lost, powers of hearing and utterance that he can converse with those who speak to him distinctly and deliberately. During the past four or five months he has been made considerable progress in reading and arithmetic."

matic."

Having been supplied with the lad's address, we further investig sted the matier, and discovered that previous to calling on Dr. Lighthill, the youth scase was consultered hopeless, and he was for two years an inmate of a Deaf and Dumb Aspium. The Rev. John Nott, D. b. Professor in Union College, Schanectally, incapuolished lefter, tenders his gratitude to Dr. Lighthill for treating successfully his case of deafness. Hev. Fred S Jewell, Professor of the State Normal School at Albany, also testifies to have been cured of catarrh. Dr. Lighthill possesses other testimoutials and tributes to his talent from some of the wealthiest and most prominent and respected citizens, which may be seen on application. It would be difficult to
