LOCAL INTELLIGENCE

ADVERTISING AGENCIES. Messrs. S. M. PETERLIN & CO., No. 37 Park Row, New York city, and No. 4 State Street, Boston; and L. P. FONTAINE & CO., No. 55 Nassau Street, New York city, are authorized to take Advertisements and Subscriptions for us at our lowest rates.

Whisky.—The amount of bad whisky consumed during the last two or three years is truly astonishing. The genuine article has reached such a very high price that it is entirely beyond the reach of professional drinkers, and the consequence is that they are compelled to imitate adulterated liquor or do without their usual nutriment. Continual "nausea" now-a-days have the double effect of raising the price and cannot afford to supply their customers with good whisky without incurring a loss on their part. An alternative to this state of affairs, and one not willing to submit. Owing to the facts, the chemical mixture which is present in old liquor stores under the name of "Fernet-Branca" is a powerful agent in ridding a man both in mind and body. It is true that whisky is sometimes sold in its pure state, but even then it would be far better to abstain from it entirely. We have never heard of total abstinence raising a nervous constitution, but we know that men have neglected their business and destroyed their health through the use of stimulants. Cases of delirium tremens have been frequent occurrences of late on account of this prevailing evil.

The Newboys' Home.—The Newboys' Home is now in successful operation under the auspices of the gentlemen who first obtained this charitable institution and the excellent matron who has the care of the boys is immediately entrusted. The boys are in a comfortable home during the winter, and the gentlemen who superintend the institution use every means to make them feel content in their new home. The boys are all well, and a perfect success, and the boys who have engaged quarters there have formed an attachment for the place, which is the best in the city. The excellent manner in which everything is carried on here. We understand, however, that the boys are ready to want warm clothing to defend them from the cold weather, and to which they are continually exposed. The female portion of the community could not find a better opportunity of doing good than by procuring clothes for the boys, and by providing them with a supply of clothing.

Severely Wounded.—A man named Thompson was wounded in the breast on Saturday night at the Ninth ward. It is stated that he had been in the Ninth ward during the evening, and when leaving a man by the name of Owen, who has a crippled hand, struck him with a knife, but he refused to fight with a cripple. Owen then struck him on the head, and Thompson persisted in his determination not to injure him. He then proceeded homeward, and on arriving at his own house a man named Owen came up to him, and he would fight him, and thereupon struck him with a knife, inflicting a severe, though not dangerous wound. He has not as yet recovered from the wound, but Owen was subsequently arrested on information being made against him by Thompson, but Owen succeeded in making his escape.

Man Drowned.—A man named Hiram Reef was drowned in the Allegheny river on Saturday night at Lock No. 3, Fort Ferry. It appears that he was at the lock awaiting the arrival of a steamer on which to take passage to this city, and while waiting he had accidentally fallen into the lock. He was heard struggling in the water by the lock-tender, who hastened to his assistance, but was unable to rescue him. The body was recovered on the following day and an inquest held by Coroner Clawson, when a verdict of accidental death was returned.

Temperance Club Lectures.—A large and fashionable audience was present last evening at Lafayette Hall, to listen to the popular and unrivaled lectures of Mr. J. E. Murdoch. Another large attendance is anticipated this evening. A splendid and interesting program is on the following day and an inquest held by Coroner Clawson, when a verdict of accidental death was returned.

The Rivers.—The rivers are in excellent heating order, and it is thought another winter will soon take place.
