The Times is wonderfully mistaken for had Mr. Lincoln within the rebellion began, called for sevents five thousand volunteers to high feet negro emancipation and Southern suplugation, instead of defending our National capital, he would not have got one regiment. The great body of the people would never have actioned such a cruenda; while the patterns Abolitionists who did were thosowurdly to take part even in such a chaffict. Even prive that miserable set, while anxions for the desolation of the South, from mere hatred of its people, will not enter the service, except in

The Union they always denounced instead or defendel; and all their profession. of Unionism of late are but a mask to conceal their ocual purposes. But it was not policy for them to svow their infernal intentions; they consequently raised an immense sample by appealing to the people's patriotism and love for the Union; and afterwards, instead of directing their immense resources to crush the rebellion, they used them to familiarize the people with deeds of war, and that we could have no peace until it was destroyed. By this means the comming of Applitionism triumphed over the common sense of the people; a complishment of its bloody designs

Had the Administration labored to restore the Union with one tenth of the end.

In other words, says the Patriot receives that amount in taxes from you, with a lien on your thousand dollar homestead, as ultimate security, then you can't be "much oppressed." because you owe yourself the thousand dollars cash, and if Abraham can't get taxes enough out of you to pay you, why your homestead is always full security for the amount. Of course, "men readily perceive" this, and feel perfect assurance that they can't be "much opressed" by it, for, don't you see, when ever they begin to feel the pressure. they can forgive themselves the debt. and-presto, the lien is canceled '

The Chicago Post notices another ioke of the President's regarding his off repeated determination not to return any one to slavery. His administration of his purpose not to re-easlive any person body, is a judicial question; if under legally entitled to freedom, it is not in the power of any one. President, Congress or Judiciary, to remand such person but established any one slavery. If the proclamation emancipated no person, but left all who were slaves, in slavery still, then he cannot be called upon to re-enslave those who were never emancipated. That the capacity of paymasters or contracwho were never emancipated. That are as we have stated, less warm than take not at all improved by his threat the summer clothing of men. And it is to resign, has been repeated several times by him, and he might now permit it to rest a while.

Dr. Davy said the vrobability was that women did not resist cold so well as. men, and that the greater the strength and energy, the erger the quantity of blood flowing, the greater would be the power of resistance. Generally speak-ing he believed that women suffered more from sold than men, and really required a warmer dress than men. The practical bearing of this interestng and important subject is indicated in the remark of Dr. Davy, to the effect that wemen really require a warmer dress man men, for the preservation of hat ratural temperature of the body without which it is impossible for its functions to be properly performed. At this season of the year it is well to call ttention to this scientific yet practical fact. Common observation demon-strates that the customs of society and of

fashion lead to habits directly opposite to those which are here shown to be desirable, and even necessary to the main tenance of health. The property of the Drake Petroleum Company consists of two tracts of land, one of two hundred and fifty-seven aores. and one of two hundred and istry-five acres, making in all five five hundred and tweive acres in fee, on the Caldwell Branch of Oil Creek.

The property has been critically examined by a Committee appointed for that purpose, and the territery pronounced, in their judgment, to be fully equal to that on Oil Creek, along which the largest oil wells ever discovered have been found. which the largest on wells ever dissolved and been found.

The lands resemble those on Oil Creek, in every particular, and it is believed from the large number of oil aprings in close proximity, that valuable wells will be opened on both these tracts.

The management have already secured several
Engines and engaged a competent Superintendent, with a view to immediate and an energetic developement.

A large portion of these tracts is bottom, and admirably adapted for boring.

Several Companies are organized on lands immediately adjoining this territory, among which are the Briggs and Crescent City Oil Companies. In presenting the Drake Petroleum Company to the public, the Directors ask that their scheme should be examined, and subscriptions made to the stock in full faith as to its present and prosepective value.
