LUCAL INTELLIGENCE

For' the Holidays .- The holidays are a hand, and as it is customary during those times to bestow a large number of presents upon friends and acquaintances, it is a matter of im-portance to know where the most suitable gifts can be found for our friends. We have nothing to say concerning the gift itself, as none but the recipient can determine what sort of gift will please him best, for which reason, among the many advertisers in the Post, we have detered to give our readers a full opportunity to make a good selection. They may rest assured that any article that is noticed in the Post will be found of the very heat in its line. In former years a present of a suit of clothes

From the Home Journal, June 4. In every business of profession, indeed, in every department of science or skill, there is alwa; a some acknowledged hed-isome one who stands out in bold relief among his fellows, as a sort of leader. In the study and treatment of deafness and catarrh, as special diseases, Dr. E. B. LiGHTHILL, of this city, occupies just the position above described. He has devoted years of labor to this speciality, and is now redoing the reward of his industry. The editorial col-nras to the Drobuw, of a recent date, bear wit-nras to the Doctor's success in this department of medicme. We quote the paragraph: "Cuns of A Date Mirre, -Louis Loewing-stein, a lad fourteen years of age, born in Germany, come to this city when he was about two years old. Soon after his arival here he was taken aick and lost ils bearing. If d'graces he became first deaf and then dumb. For nearly then years he was a mute, unable to hear the ioudest voice or to artiguinte a word. About one year ago he was placed by his parents in the hands of Dr. Lighthill, who has so far succeeded-in restoring to firm his first powers of hearing and utterance that he can converse with those who speak to him distingly and deliberately. During the past four or five months he has been under the fution of Mr. Beeneche, and has made considerable progress in reading and arith-metic." DIETETIC & CULINARY ARTICLES Pure Gream of Tartar.
