The next person I called for was native of Egypt, who has been for many years resident in England, where he has adopted out dress, and who had long been confined to his bed by illness before I embarked for this country; I thought that his name, one not very uncommon in E. gypt, might make the boy describe him incorrectly, though another boy on a former visit of the magician, had described this same person as wearing an European dress, like that in which I last saw him. In the present case the boy said, 'Here is a man brought on a kind of bier, and wrapped up in a sheet.' This description would suit supposing the person in question to be still confined to his bed, or if he be dead. The boy described his face as covered; and was told to order that it should be uncovered. This he did, and then said, 'His face is pale, and he has mustachios, but no beard, which is cor-

That there was no confederacy, says Mr. Lane, I satisfactorily ascertained by selecting the boy who performed the part above described in my presence, from a number of others passing by in the street, and by his rejecting a present, which I efterwards offered him, with the view of inducing him to confess that he did not really see what he had professed to have seen. The result was the same with another boy on another occasion. Then again, supposing by pictorial representations, or descriptions otherwise procured many public characters might admit of accurate description, what previous prepabing a certain obscure individual as lying in a winding sheet, or that which follow is still more extraordinary?

On one of these occasions, an Englishman present ridiculed the performance, and said that nothing would satisfy him but a correct description of the appearance of his own father, of whom, he was sure no one of the company had any knowledge. The boy, accordingly, having called by name for the person alluded to described a man in a frank dress, of course with his hand placed to his head, wearing spectacles, and with one foot on he ground, and the other raised behind hm The description was exactly true in every respect; the peculiar position of the land was occasioned by an almost contant headache; and that of the foot by a stiff knee caused by the fall from a hore in harting.

A late Paris paper relates that the following:
During the last year, a stoman named Gaudorcille, the inhabitant of a little village net Montpoliar, in France, was select wit a kind f insanisty, which made her dread to go near theire, and

After having employed a number of remedies in hope of relief in vin, the idea came into her mind that she was pressed by a demon, and that a man by the nampf Sales, the village joiner, whose family had or some time lived in the same house with her, he being introduced by the bushand and relations of the stient, was fully believed by thom; and the reart was spread through the whole village that alles the joiner had be witched dame Chaudoville, and soon afer Chaudorcille's hasband, hepened to meet Sal lavin a by-place, threatened a kill him if he did not blieve his wife from the stichantment. Salles in vain protested against and denied the charge; the public opinion, notwithtending all his pro testations, pronounced him the real author of profession, who lived a Montpelier, and was celedivination. At the solicitation of the relations of dame Chaudorcile, Conte consented to visit the eick woman. She established herealf in the bosse, and remained there for eight days, and darring this time kept up-a succession of operations of witcheraft, is order to expet the design from the body of the victim. She lighted little tapers about

At the end of the eight days, the expulsion not having been effected, but the pattent having, as she mid, experienced decided salis, as a token of grafitude, several baskets of stuff, and a present (public rumor says) of 400 france (Dame Chru-doznile says 40) was given to the witch. The patient, however, soon fell back into her suffering andition, and all the benefit derived from Dame Conte's visit was lost. Chaudercille and his wife were accused-the one of threatening to kill, the other of divers injuries committed against, Salles. Dame Conte, (a great rubicuad lady, who had formerly been imprisoned for having practised the trade a witch,) denied all the facts of which she was accused, and protested she had never been in the specified village, and knew nothing of Chandorcille or his family; but her denial came to nothing before the numerous witnesses who were produced and so the tribunal pronounced the acquittal of Chaudorcille and Carriere, but conlemned Conte for cheating to three months' imprisonment. The court probably acted up to their light, but, from the account of the French journal, of which this is an abstract, it does not appear that the vengeance of the law had reached the most guilty person, or that poor Salles had succeeded in obtaining any relief.—Boston Ad-

The antimasons are busy at work in all parts of the county, trying to force the people to lend a helping hand to their sinking cause. Their emissaries are traversing every township, distributing handbills, filled with falsehoods, of course, slandering the democratic candidates and misrepresenting their principles, and lauding the honesty, competency and patriotism of a ticket that has Neville B. Craig for its head! The persons appointed for this purpose are ashamed to present their lying documents to the honest farmers, but they drop them in whole bundles on tection of country tenner dispose or metrical floads, and they drop them single, double, and some times in whole them is a second of the secon and some times in whole bundles in the highway. Yesterday, there was a large bundle found on the public road, ahout 20 rods from my house."

We have seen one of their bills, and it is made up of such truck as was used by the coonskin and hard-cider politicians in 1840, and with which they expect again to gull the people in the country. We cannot imagine that any man who was de- it. ceived, by their false promises in that memorable campaign, will again place a "generous confidence" in their professions, and permit them to deceive him a His reputed wife, Sarah Whitney, alias second time.

paragraph in relation to a notice which has caused considerable "agitation" among a portion of our community.

"The Post of yesterday is into us like a thoueand of brick, for finding fault with its attempt to excite the feelings of the Germans eguinat the the Antimascus and Whigs of this county because a German was not allowed to ask a question in a public meeting, and was arrested by the Police -We have nothing to say in favor of the course pursued towards the Germans. We were not at the meeting, and know nothing about the facts in the case, but we do say that the attempt to excite projudiciating among the Germans, because one them may not have been well treated, is a mis erable political subterfuge, resorted to for p ditical effect on the eve of an election, and would be as lisreputable in one party as in another."

But have you nothing to say in condemnation of this insolent outrage on the rights of speech? Can you stand quietly by and see a citizen rudely dragged off and confinwin the "Tombs" among drunkards, thieves dame Chaudorcille's madees. Things were in this state when the sick roman had recourse, for her relief to a certain Jame Conte, a witch by in the august presence of the managers of the federal meeting-! If the German's conduct had been really improper, it would have been blazoned forth in the Police Rea ports of the papers that furnish such matter to there readers, accompanied by moral reflections on the impropriety of Germans meddling with questions of which they know nothing. But there was nothing wrong in this person's conduct; he asked a civil question, and as we believe, with an honest desire for information, and if it had been a democratic meeting his questions would have received a civil answer. But he was unfortunately among men who do not acknowledge the rights of the "poorer classes" to ask questions respecting the

fication of the extendedinary proceedings of the Mayor and his police this matter?

The San has frequently boasted of its neutral position in politics, and its readiness to condemn the faults of either party and has frequently rubbed down both for small failings; but it seems that an outrage on the liberty of speech, is not a fault of sufficient magnitude to call forth its censure and the petty tyrants who would imprison a man for daring to question their principles, are permitted to go unrebuked. If a democratic meeting would commit an outrage half as base, we think the Sun's thunder would not be so small.

As we expected, the Gazette saddles the President with these expenditures instead of the federal majority of the House, led on by its favorite, John Q. Adams, and its remarks have a tendency to make the public believe that if extravagance has been practised, Mr. Tyler is responsible Guard." for it. What unprincipled creatures federal politicians are!

Coming to their senses. Many of the leading whigs of Rhode Island are coming "out from among the vile party," and enrolling themselves in the ranks of the peop'e. At all the popular gatherings (called clam bakes,) of the suffrage men, we find some prominent whig confessing his sins, and promising amendment. A Col. Samuel Wales, who was a leading coonskin orator in 1840, attended the clam-bake at Acote Hill, and gave his reasons for remouncing whiggery. He said he was in favor of the sovereignty of the people; he wished that sovereignty to be exercised through the forms of law when practicable, but if the servants of the people set themselves up as masters, and refused to give an opportunity to amend the constitution when it was desired by a large majority, then it became necessary for the people to take the work into their own hands. He had been a whig, but now he had found out what whiggery meant:—he was offered a purse of two thousand dellars for no whig according to the present meaning of four mile heats. the highways.
