DR. FRANKLIN SAYS:

"All acute fevers ever.require some evacuation to bring them to a perfect crisis and solution, and that even by stools, which must be promoted by art when nature does not do the business, itself. Oo this account, an ill timed scrupulousnessabout the weakness of the body is of had consequences; for it is that which seems chiefly to make evacuations becassary, which nature attempts after the humors are fit to be expelled, but is not able to accomplish for the most part in these diseases; and I can affirm, that I have given a purge when the pulse has been so low that it could hardly be fell, and the debility ex treme, yet both one and the other have been restored b it." The good effect to be derived from the Brandrett

Pills have to be experienced to be fully believed. By their timely use neither the scarlet, the typhus fever or nall pox would ever assume their matignant form.
