## DB. FRANKLIN SAYS:

"All acute fevers everedulie some evacuation to bring them to a perfect crisis and solution, and that even by stools, which must be promoted by art when nature does not do the business itself. On this account, an ill timed scrupulousnessabout the weakness of the bod is of bad consequences; for it is that which seems chiefly to make evacuations necessary, which nature attempts after the humors are fit to be expelled , but is not able to accomplish for the most part in these diseases; and I can affirm, that I have given a purge when the pulse has been so low that it could hardly be felt, and the debility ex. treme, yet both one and the other have been restored by it." The good effect to be derived from the Brandret Pills have to be experienced to be fully believed. By their timely use neither the scarlet, the typhus fever small pox would ever assume their malignant form. small pox would ever assume their maignant form.
