a missible pretense that the national was not to be trusted, was contradiered by a variety of propositions in direct allision with such a belief. Assumption was to be the panacea by which all evils were to be cured. The number and vaviety of advices and lessons of wisdom with the explunteered to enlighten the mind of our Commissioner, would, if rewed exhibit an amusing specimen of logic, by which all conflicting varieties of in terminated in the same result.

But the secret of this combination of European capitalists and domestic speculatora, only leaked out at the last moment, by one more communicative than the rest. And what, gentle reader, do you suppose it was? That they were afraid to trust the national government for five millions? -No! But because the loan was not a bundred millions. The bait of a five million six per cent loan, was not sufficient to induce them to give up their game of assumption; but a hundred millions of six per cent. long loan would be, and the reason is as plain as day light. Our three per cent. National Loan being equal to the best European investment, the extra three per cent, would make up all deficiencies in the defaulting State Loans; and thus they would actually receive the full amount of both, while they would continue to taunt us with defalcation, after having received, in fact, though not in form, payment of both national and state debts.

These, so far as our letters, and they are English letters too, will enable us to judge, are the conclusions to which our commissioner and all others acquainted with the facts, must arrive. That this combination, powerful as it is, must utterly fail, the actors in it will be convinced, upon the first appropriate occasion upon which the government will allude to it. And we have no doubt so far as we can judge by inferences, that the most inflexible determination exists against the entertainment of such a proposition as assump-

In concluding this article, we can only say that the National Loan has not been refused in Europe, for the very satisfactory reason that it was never offered, The right of the commissioner to dispose of it at par, was predicated upon his ascertain get rich by mere labor? and, ing that no such hectoring combination existed as was here suspected .- N. This is our recollection of what now seems so monstrous a 'wickedness' to the editor of the Gazette. It seems to us then, that, as the Philadelphia Whigs were the cause and that the 'rebuke' by the people of the State, which followed it, is quite as much a rebuke to men who wished to send Representatives to Harrisburg, without first legally electing them, as to Ritner's Administration, or the 'unnatural Union'

which brought it into power.' It is to be hoped that the United States Gazette will hit the Chronicle again, and bit it harder than before. The Chronicle 'counters' beautifully, and the charm of the thing is that both parties to this quarrel tell the truth of each other. It will be seen that the frauds of 1838, in the county of Philadelphia, are thus clearly admitted.

It is true that these papers are alluding to different matters—the Gazette to the antimasonic inquisition of the winter of 1835 6, and the Chronicle to the effort to treat elections as if they had not taken place," which happened in 1838; but still this makes no material difference. The truth is told as to both affairs.—Pennsylva-

A Coon Project.

WM. Cost Johnson, of Maryland has stituents, which is published in the Nat. among the States. Mr. Johnson concludes his argument in favor of his plan with the justly proud. declaration that the Government must aor resort to repudiation. This is the true and only infallible principle of Coonism.— If the aristocratic leaders of that party can get permission to plunder the people thro' the means afforded by Congress for stock gambling, they will be satisfied, but if their hopes in this quarter are blasted. their next scheme is to cheat the creditors of Congress, of the Government by repudiation. They must prey on some one, and they make the first attempt on their own "friends and fellow citizens," but failing in this, their next effort is to "take in" all the strangers
