class of individuals is very numerous. They are those who work in an unhealthy atmosphere. Printers, work men in feather stores, stone cutters, hakers, white lead manufacturers, are all more or less subject to disease according to the strength of their constitution The only method to prevent disease, is the occasional use of a medicine which abstracts from the circulation all deleterious humors, and expels them by the howets. Tonics in any form are injurious, as they only gut off the evil day to make it more faial.
