In Association, the great object to be gained is the perfect equality of its members. By "equality" we do not morn the "right to vote" in the election of officers, or the "right of trial by jury," which are about all the equality vouchsafed to man in the present state; but we mean the natural right of man to all he carns by his toil. Now he is depied this. In England, it has been estimated that the actual producer does not get men there the onesforlieth of the value of his labor, and we may say than" he gets very little more in this country, The principal cause of it is this: workingmen cannot enjoy the produce of each othjan 9 ers labor without first letting it pass tho the hands of the speculator; who, as his calling is what the world calls "dignified," must have a large profit on the trainaction -sufficient to pay the banker, upon whose capital he is dealing, and to maintain himself in luxury and splendor. "Thus are the producers of all wealth robbed; though they

know it not; and remain ignorant of the reason why they, who create everything, get almost nothing. In Industrial Association, this grand

feature of the present social system is blotted out. Speculation will not be tolerated.
