DR. FRANKLIN SAYS: "All acute fevers ever require some evacuation to bring them to a perfect crisis and solution, and that even by stools, which must be promoted by art when nature does not do the business itself. On this account, an ill timed scrupulousness about the weakness of the body is of bad consequences; for it is that which seems chiefly to make agreemations account. to make evacuations necessary, which nature attempts after the humors are fit to be expelled, but is not able to accomplish for the most part in these diseases; and I can affirm, that I have given a purge when the pulse has been so low that it could hardly be felt, and the debility exreme, yet both one and the other have been restored by it." The good effect to be derived from the Brandreth Pills have to be experienced to be fully believed. By their timely use neither the scarlet, the typhus fever or small pox would ever assume their malignant form. ravelers.
