

But to the article in question: To the Democracy of Pennsylvania we would say that the statements of the Keystone, in reference to the Governor, are utterly false. That David R. Porter is in league with any man, or is a party to any combination that has for its object the division of the Republic, is a matter of which the Democracy of Pennsylvania is not worthy. The coalition set forth by the Keystone, between the Governor and John Tyler, was a trick got up to influence Whig and Democratic votes at the election of a State Printer. The plot was simply this: The Keystone, Keiser, Porter, and Gazette, had combined for the purpose of obtaining all the printing patronage of the Government. They had entered into an article of agreement, mutual stipulating to share the spoils in proportion to the value of their respective establishments—to oppose and prostrate the State administration—to advocate the claims of one candidate for the Presidency, to the exclusion of all others; and it was understood, to advance the interest of a particular individual as the next candidate for Governor. At the first balloting for Printer, this combination, represented by the Editor of the Gazette, received fifty-two Democratic votes for Printer; at the second, on Friday last, it received but 46 votes, and a large number of those were anti-masonic. Meeting with this second defeat, and apprehending that John H. Dimock, the independent Democratic candidate, would succeed at the election on Monday next, a plan was devised, by which they expected to defeat him. The development of that plan we find in the last Keystone. An assauld was to be made upon the political integrity of the Governor—the cry of a transfer to Tyler was to be raised—the whole Whig strength was to be united on Mr. Bratton, in opposition to him who was alleged to be the Tyler candidate—the Democrats were to be befriended into their support by alarming them in regard to "Tylerism," and in the confusion that was expected to result from the execution of this plot, the Keystone and its associates were to succeed in obtaining the public printing. Such, Democrats of Pennsylvania, is a condensed history of the late movements of the Keystone against the Governor. Representing no faction in the party—indebted to no administration for its favors, and calculating on supporting our establishment independent of all official patronage—committed against John Tyler, and in favor of the gallant Cass—we break a lance in favor of your Executive, with no expectation of reward, and from the sole conviction that he has been the subject of the most atrocious treachery and damming ingratitude.

From the Pa. Reporter of April 1. LEGISLATIVE SYNOPSIS.

In Senate, yesterday, Mr. Dimock, from the committee of conference on the Senate and Representative Appointment bill, made report, directing the state as follows:

Insanity from want of employment.

During the drenching rain on Tuesday morning, says the Quincy Aurora, an individual of the name of Housley was observed bareheaded in the streets with a child in his arms, braving the fury of the storm, and proclaiming "a great and terrible judgment is at hand." His cry was mistaken for an alarm of fire, and a scene of confusion followed, till it was discovered the man was actually insane. No case could be assigned for his derangement, except that he had been living in great destitution for want of work.

The Editor of the Midnight Cry, the Miller paper published in New York, has published a letter in the Express, in which he says he receives subscriptions for only three months at a time; that there is no truth in the story of the death of a Miller while endeavoring to ascend into heaven from a tree; and that a clergyman of Washington has embraced all the essential doctrines of Millerism.

A perfect sympathy.—The Spirit of the Times tells a story of a Magnetizer in Ohio who after much labour magnetized an individual, exhibited to the audience his trembling hand, "I never was so nervous in my life—I'd give a shilling for a glass of brandy and water." To which the sleeper in sympathy responded: "I should like to have some of the same myself."

Won't have a Regulator.—A bill was passed at the last session of the Ohio Legislature, to establish a Bank at Dayton, but when the subscription books were opened, not one dollar of the stock was taken. This looks like returning to good sense.

From Mexico.

It was rumored that Santa Anna had sent agents to Houston, to treat for peace between Mexico and Texas.

One hundred and eleven Texian prisoners, who were taken at Uter, and who effected their escape, had been re-taken.

From all accounts, the Mexicans are preparing additional forces for the siege of Camperchy. Seven hundred troops sailed from Vera Cruz to reinforce the army at Camperchy. The Mexicans were preparing for a vigorous and well concerted assault.

Curious Procession.—The lady editor of the Boston Transcript publishes the following order of a procession which is shortly to march through the streets of Boston:

Female patrons of Mrs. Gove's lectures on anatomy, four deep, without coats, and in the dress of the "Young Men's Guide;" and "Directions for Young Mothers;" Admiration of Brown's new system of English Grammar, in which active verbs are represented by hooks and eyes. Sympathizers with Amy Hadden, who vainly solicited Congress to indemnify her for the loss of a cream-colored dress in the revolutionary war.

Advocates for sleeping on corn-stalk beds. Cithrocyant females who examine the sick internally.

It is said that a splendid building is under way at Worcester, Mass., which is intended for the organization of a college of the Jesuits, to be devoted to the education of youth in the higher branches of classical learning and science. A highly accomplished and learned Jesuit, from the "eternal city," is to be the superior, and it will be opened for students with great pomp and splendor in October next. What a year or two past there seems to have commenced a remarkable revival among the Catholics in this country, particularly in the Great Mississippi Valley, where Churches and Cathedrals are being built in many places.

PATENT SELF-PAYING TOBACCO BOX.—An Albany (N. Y.) paper contains a description of an ingenious invention, which has recently been introduced into this city, called the Patent Self-paying Tobacco Box, intended for the use of persons in hotels, and other public houses, where tobacco is in demand. On depositing a penny in the box, and pressing a spring, a little drawer shoots out containing a small paper of tobacco. But the drawer will not move, until the call for tobacco is answered, however hard the spring may be pressed, until the penny is dropped into the sub-treasury of the machine.

The truly pious man is a good chance in the race with a mean, shuffling politician. The trickery of the black leg, not his skill, gains the game!

A good man rarely finds favor with Power; he sneaking, intriguing, lying, cunning politician is almost always gains the prize.

The Damagoe is honored by the office; the worthy man would do honor to it.

Largo donations to charity, do not constitute piety, any more than large professions constitute friendship. Both are often mere devices.

Reason and Fancy.—Reason is like the sun, which the light is constant, uniform and lasting; a meteor of bright, but transitory lustre; irregular in its motion and delusive in its direction.

A man who is placed in a position to which he is unequal, will be very apt to fall below that position to which he is equal.

There is a female Circus rider in Paris, a native of Bohemia, who throws 42 sumo-merrets in succession from the spring-board, and 5 successive back summersets on a horse going at full speed.

Camperchy.—At the latest accounts up to the 11th ult. the Mexican army were 12,000 strong, and had possession of the heights commanding the city, whence they bombarded it daily. A fleet of eight sail and a large iron steamer, were anchored off the bar, annoying the town from that quarter. The people of Yucatan were not dismayed. Their arms within the walls numbered 10,000 men, and nightly sorties were made on the besiegers, in which no quarter was given on either side—General Lamas, who treacherously attempted to deliver the city into the hands of the Mexicans, had been arrested and sent in irons to Vera Cruz.

Attempt to break Jail.—Moffit, the burglar, made a successful attempt to break the N. Y. jail on last Sunday night, but did not get quite clear. He cut a hole through the floor of his cell, under his bed, and by tearing his bed clothing into strips of about three inches in width, he made out to lower himself into an empty cell below, the door of which was open, and then reached the top of the edifice when he concealed himself on a water trunk until morning, when he was discovered.

Another Bonfire.—The Illinois State Register of Saturday last says, Governor Ford committed to the flames, in the presence of the people, \$500,000 more in State indebtedness, received from the Bank of Illinois, at Shawneetown, in part payment of the stock held by the State in that institution. This makes a sum upward of two millions five hundred thousand dollars, in amount, of our State indebtedness liquidated and burned, under two jaws alone, passed by the Legislature this session.

Michigan.—The Detroit Free Press, in answer to the charge against the Democrats of having chartered the banks in Michigan, says: "the democratic Legislature provided that when any bank suspended specie payments, it should go out of existence; but when the whigs came to power, they repealed this wise safeguard, and authorized the banks to go on, do business, and issue paper, while in a state of suspension as to specie payments."

A queer Politician.—The Statesman in speaking of Mr. Wright who has been elected Mayor of Columbus, Ohio, says: "The Mayor elect, it is politically a singular non-script compound—a Tyler anti-United States Bank kind Money-Clay man, and withal one of our best and most popular citizens."

Fatal Affray.—A fight took place in the streets of Augusta, (Geo.) on the 29th ult. between Mr. R. Harding, clerk of the Arsenal and Wm. H. Platt, Esq., in which the former was mortally wounded. The Chronicle says:

Platt, who felt himself aggrieved by the previous conduct of H., who declined an introduction to him, accosted H. from his rear, and, on Harding's facing round, he was shot directly through the body, the ball lodging in his clothing behind. Harding fired soon after, but his shot not taking effect, Platt ran, when H. exploded a cap, and fired at him again, but missed; whereupon Platt returned, and after having run some fifteen or twenty yards, and assaulted H. with a bowie knife, but the timely interference of some gentlemen, who approached, arrested him. Harding is considered beyond the hope of recovery. Platt was arrested immediately after the affray, and committed to prison for examination.

The "Harry of the West."—The Cincinnati says that since the new steamer Harry of the West dropped down to that landing from the ship-yard, the citizens generally have paid her a visit. She is universally pronounced the best boat ever built on the banks of the Ohio. She is
