

made children of us. When our business settled we shall be men again, and talk to our Great Father about what he has proposed.

THE HON. WILLIAM TYLER, of Virginia, brother of the President of the United States, recently appointed one of the Choctaw Commissioners.

IMPORTANT SUIT.—Jeremiah Van Rensselaer has brought a suit in Equity, before Justice Thompson and Betts, of the United States Circuit Court, against the Executors and devisees of John Watts deceased, to recover possession of the property, consisting of about 75,000 acres of land, formerly known as 'Claverack Manor,' in this county. The claim is founded on the following facts:

In the year 1783, John Van Rensselaer, the elder, lord of the lower manor of Rensselaerwick, (usually termed Claverack Manor), in Columbia county, devised the manor, in trust, for his grandson, John I. Van Rensselaer, who was to have the rents during his life, and then it was to be entailed, forever, on his male heirs. Soon after the making of the will an act passed, abolishing the principle of entail and declaring that persons so holding should be considered as possessing a fee simple. In 1764 John I. sold the manor for \$40,000, and it has since remained in possession of the parties purchasing, or their assignees. No consent, as to the guarantee to the title, appears to have been given. Much of the property has since passed into other hands. John I. died in 1827, and the present action was brought by his eldest surviving son, who resides in another State, and claims possession of the property on that John I. had no right to sell it, not possessing a right fee simple under the act, but merely a life interest, and that the entail could never have effect till after his death.

If this suit should be determined in favor of the plaintiff, it will invalidate the titles to some of the finest farms in the State, and doubtless cause much litigation. *Illustration Rep.*

Terrific Disaster.—We are pained to record another sad disaster, attended with loss of life, in our waters. At about 12 o'clock yesterday, the towboat Phenix, Capt. Annable, having in the skip Flavius, from Liverpool, burst three of her boilers, which caused Carrollton, clearing and otherwise injuring nearly every person on the Phenix, of whom three men, named Charles Davis, an Irishman, John, a Portuguese, and George, an American, were instantly knocked off overhead, and several were scalded. The Pilot of the Phenix, several were scalded, and not expected to live. James Skinner, Second Engineer, is also dangerously scalded, with but little hope of his recovery. In addition to the above, five firemen, names unknown, were scalded, one of whom died last evening.

The Captain of the Flavius was slightly injured by a plank hurled against him, but Capt. Annable escaped unhurt.—*N O Tropic.*

Gold.—Surely this State is in the neighborhood of it, is not El Dorado itself. Gold has been extensively found in Moore, Chatham, and Wake; and some of our citizens have found pieces of soil, containing brilliant particles, having every appearance of gold, and which many believe to be gold; but the most knowing ones say it is sulphur. Hurra for old North Carolina, if she has not the richest soil in the world, she grows the 'yellow boys.'—*North Carolinian.*

More Gold.—We understand that a gold mine has been discovered on the waters of Middle Creek, in this county, by Maj. Wm. F. Collins, of this city, which promises a rich yield of the precious metal.

He has bought a large portion of the gold region, and is preparing to go to mining in real earnest.

Gold has also been discovered on the lands of Martin Jones, about 12 miles from this city, which, if properly managed, will no doubt prove a handsome fortune. The gold is found in small particles, mingled with the soil.—*Haltigh Star.*

The Oldest Diplomatist.—The Chevalier De Gaussens, the oldest French diplomatist, died the other day at Paris, at the age of ninety six; having lived by full half a century the era when the philosophical statements of France declared that the old fashioned diplomacy had ceased to exist, and survived to see the defeat, like John Barleycorn, get up again and sore surprise them all, flourishing in a leafy forest of protocols. The word of the 'oldest diplomatist' is always listened to with respect when the talk is of anything unprecedented; what then must have been the deference paid to the remarks of 'the oldest diplomatist alive?' The Chevalier had been Minister at the Court of Frederick the Great, and was dancing at the ball when Ankerstrom shot Gustavus. He was a diplomatist when Franklin sent the strong red line letter, and diplomatist when Mr Sparks discovered it in the King's Library.—*Montreal Courier.*

Jamaica papers mention that recently a demand was made by the Haytian Government upon the Government of Jamaica, to deliver up Ex-President Bajer, who, it will be recalled, fled to Jamaica during the late revolution in St Domingo. The demand, it appears was treated with ridicule.

FOR PRESIDENT.
JAMES HUCHANAN
Subject to the decision of a National Convention.
DAILY MORNING POST.
MONDAY, JUNE 4, 1843.
See First Page.

The great body of the blue noses are much dissatisfied with a majority of the candidates nominated at the Convention last Wednesday, and some of them make no concealment of their intention to oppose a portion of the ticket. We think they are right, for with two or three exceptions, it is the worst ticket that was ever presented to the Antimasonic party.

The blue noses will find before the election that they have made a great mistake in severing their connection with the whigs in such a summary manner, and that, thrown into the contest as they are now, without the zealous aid of the old leaders who brought them victory in former campaigns, they will encounter much difficulty in whipping the "shippable articles" into the Antimasonic traces. Power seems to be fast slipping from the hands of the Morganites, and as their strength fails, their pride and management also leave them. Their tampering with the abolitionists in the March Convention, caused so much disgust that many abandoned the Simon Pures, and favored the policy of the whigs, and then the treacherous manner in which they treated the abolitionists last Wednesday, has excited a strong feeling of indignation in that party against them, and will cause it to desire their defeat.

It is thus every day becoming more apparent that Antimasonry is on "this last legs," the tyranny and inconsistency of the whigs are slowly but surely working their ruin, and in a short time Allegheny will be as free from the malign influence of the "blessed spirit," as any other county in the State.

U. S. Steamer Missouri.—This fine vessel recently made a pleasure trip down the Potomac for the purpose of testing an improvement which some genius in the employ of the government, proposed to effect in her smoke stack. The improvement consisted in cutting down the smoke stack, which was thirty feet high and eight feet in diameter, close to the hurricane deck, closing it at the top, and in substituting therefor, two lateral pipes, each about three feet in diameter, leading into the wheel house just above the paddles: It appears from an account of the trip published in the Globe, that the plan is not likely to succeed. As soon as the wheels were put in motion they took possession of the smoke which had been ascending from the wheel house, and carried it with great velocity against the water, and causing it to rebound so as to pierce every hole and crack in the vessel, until it got to her very bottom. On the after deck the smoke was so dense that it was difficult to distinguish one person from another.

Arrival of the Santa Fe Traders.—The Philadelphia Chronicle of the 31st ult. says:—The company of Santa Fe traders, nine in number, of whose arrival at Pittsburgh, mention was made in yesterday's Chronicle, reached this city about 4 o'clock yesterday afternoon, and put up at Herr's Hotel, opposite our office. They bring \$270,000 in gold and silver, ingots, bars and coin. Their effects were brought from the depot by a furniture car and three drays. The crowd about the Hotel, while porters were engaged in unloading the precious articles, was immense, and the humor excited by little accidents caused many to remain and see the fun. We noticed one thing which was the result of much merriment. A strapping black porter took hold of a bundle, which was covered with a buffalo skin, about the size of a man's head, and picked it from the wagon, when its weight, for it contained gold, pulled the colored gentleman into the gutter, on the top of his little bundle. Not understanding the cause, he arose and stood looking for a second, not heeding the laughter of the crowd, when he again essayed to take it up, but it was no go.

Deaf and Dumb.—The Deaf and Dumb Institution at Hartford, Conn. has had under instruction during the year, according to the 27th annual report just published, 123 pupils, of whom 24 were beneficiaries of Maine, 11 New Hampshire, 13 Vermont, 3 of Massachusetts, 17 of Connecticut, 3 of South Carolina, 2 of Georgia, and the remainder, 21 in number, were committed to the care of the institution by private individuals. The aggregate is by the usual average. The funds of the institution now amount to considerably more than \$200,000. The annual charge to the pupils for board and tuition, is one hundred dollars.

Improvement.—Steel pens are now electro-magnetised, or, in other words, gilt, and are much more durable than formerly.

Texas.—Some of the Texas papers call President Houston an imbecile man, and some call him by much worse names. All seem to think his proclamation against Com. Moore unjustifiable. The Tropic thinks that the British frigate Spartan has gone in pursuit of Moore in order to take him as a pirate, but we cannot credit it. We agree with the Baltimore Sun that it is not likely that "the proclamation of Houston will have the least effect with the commanders of United States Cruisers. They will not pretend to interfere with him.—Com. Moore, if guilty of any thing, is only guilty of disobedience of orders, and he is solely responsible to the Texas authorities for this, and to no one else. And when he goes to Texas, we shall be much mistaken if he is not received in triumph, instead of being taken in chains. The people of that country will sustain him."

Shocking State of Things.—The Arkansas Intelligencer contains an account of the murder of a Mr Cox, and his family, near the Choctaw line. Mr Cox was a blacksmith. "An Indian and a negro, who were supposed to be the murderers, were pursued and arrested in the Indian country, and were brought back and delivered to the civil authorities of Scott county. They confessed that they committed the crime. It appears from their statements that the Indian shot Mr Cox and at the report of the gun Mrs Cox ran to the door, and the negro knocked her down with an axe and killed her—then killed a small child and cut its head off.—They then robbed the house, and found something like a thousand dollars. They were placed in jail—but the populace became so much enraged, that they went to the jail, and took the negro out, tied him to a stake, and burned him."

Ripton Again Victorious.—We learn that the second trotting match between Ripton and America, mile heats in sulkeys for \$1000 dollars a side, was decided over the Beacon course at Hoboken, N. J., on Monday afternoon. On leaving the score at the first heat, America broke. Ripton passed him and kept the lead, winning the heat in 2m. 43s. On the second heat America broke on the first quarter turn, and Ripton led the way all round, performing the heat in 2m. 11s, and winning the purse—thus taking all three of the purse in succession.

How the English Newspapers talk.—One journal of liberal politics and decided respectability, says that with the exception of the Duke of Kent, the late Duke of Sussex was the only honest man among the sons of George the third; that George the Fourth was a heartless debauchee—the Duke of York a systematic swindler and blackleg;—and that of the two survivors, the one is a villain and the other a fool. Perhaps it's all true.

South Carolina State Convention.—The State Convention of South Carolina organized at Columbia, on the 21st. A Committee was appointed to report an address to the Democratic party, recommending John Caldwell Calhoun for nomination for the Presidency of the United States, by the general Convention, and also upon the principles on which, in the opinion of this State, the Convention should be constituted, the mode of its proceedings and the time of its assembling.

Reception of the President.—At a meeting held in Philadelphia, a committee of twenty six was appointed to make suitable arrangements for the reception of the President of the United States, on his way to Boston.

Henry W Longfellow. the poet, as it is intimated in fashionable circles in Boston, will shortly lead to the hymenal altar, the accomplished daughter of a distinguished and wealthy merchant of that city, well known upon 'Change.

The proposed Astronomical Observatory at Boston is secured, by the complete subscription of \$25,000. One person subscribed \$5000, another \$1000, the American Academy of Arts and Sciences, \$3000, &c.

The Baltimore Sun says that every dollar that is expended in advertising will yield five dollars to persons in almost any business. The Sun is a sensible paper, and would scorn to tell a lie on such a subject. If any person doubts the truth of its remarks, let them call at the "three big doors," and they will be no longer incredulous.

House Breakers.—A gang of these gentry are supposed to be in Wheeling, against whose depredations the citizens are cautioned by the Gazette.

Found Dead.—Andrew Campbell, formerly of Louisville, was recently found dead, about ten miles from Van Buren, Arkansas, supposed to have been murdered.

Bankrupt Law.—A case of much interest to persons who have taken the benefit of the Bankrupt Law, is noticed in the N. Y. Express, as being argued in the Supreme Court in that city. It appears that a suit having been brought on a promissory note, the defendant pleaded his discharge as a voluntary bankrupt. The plea was demurred to, on the ground that the voluntary branch of the act was not bankrupt, but an insolvent law, and therefore not warranted by the constitution of the U. S. The demurrer was argued by Mr A. S. Garr for the creditor, and by Messrs Gerard and Platt, for the bankrupt, and will probably be decided at the July term.

Churches in Philadelphia.—In the N. American we find the following list of the Churches in Philadelphia, taken from the Directory of 1791, compared with the present number, as shown by the Directory of 1843:

	1791.	1843.
Roman Catholic,	3	9
Episcopal,	3	19
Friends,	5	8
Presbyterians,	6	29
Baptists,	1	12
Lutherans,	2	4
Methodists,	2	30
Universals,	1	1
Hebrews,	1	1

The Presbytery of Brooklyn, N. Y., have decided unanimously, that in their opinion, there is nothing in the Bible which prohibits a man from marrying his deceased wife's sister.

Coaching Editors.—One of the Boston editors, for publishing a ridiculous account of a "high life" wedding in England, was cowbirded by a relative of one of the parties. Another editor, having confidence in his physical abilities, immediately after copied the same, and said, "noisy try me!" The Post published the following:

Notice.—We haven't bought a pair of pistols—we haven't been to a shooting gallery—we haven't asked any body to kill any one who takes the Post, and we have no desire to be killed by any one, whether he takes it not. P. S.—Open for a fight always, from 8 o'clock, A. M., until 2 o'clock P. M., and from 4 o'clock P. M., until 5 o'clock P. M., at No. 16, Wall street, N. Y. The stairs are rather steep and there are a considerable many of them. The usual time required by an individual in going from the top to the bottom one second—accompanying friends, two seconds—the principal takes precedence.

Singery.—The Toronto papers state, Simon Burnham, a merchant of that city, has fled, after committing forgeries to the amount of not less than £3000. Several of the victims are men who have stood by him in times of severe trial. The Exam. says:—"It is also asserted, that Burnham has carried with him, at least, £5000 or even £6000 in hard cash. He left this city on Saturday morning, 13th inst., by the steamer for Niagara, and we are informed, passed through Buffalo. It is probable that his destination is Texas."

Living without Sleep.—A recent number of the Boston Medical and Surgical Journal contains a letter from Mr Robert P. Gourlay, giving an account of his extraordinary sleeplessness. According to Mr G's own account, he was first bereft of sleep in the year 1833 for six weeks, when about 40 years of age. Prior to that time he had never suffered for want of sleep, although at times a little annoyed for refreshment. Mr G. was confined in London, as he alleges by British tyranny three years and eight months, and it was during this period, he thinks, that a habit of living without sleep began to form.—During his confinement he felt very little need of sleep, the greater part of his hours being spent in study, and he would not sleep more than six hours in the twenty-four, was given to reveries, chiefly, he declares, "as to laboring for bettering the condition of the toiling poor of England," &c.

Soon after his liberation, having first visited Scotland, he left Edinburgh for America. He had no sleep until he reached Liverpool, where he took a warm bath before going to bed. This had the desired effect, and procured him a few hours of repose. The next morning he embarked for New York, which he reached in 19 days, without having one wink of sleep. Immediately on landing at N. Y. he procured a warm bath, got into a comfortable bed and slept soundly. From that time forward he did not sleep for three days.—He took laudanum, but that had no effect; he drank whisky in the hope that it would induce sleep, but it only made him sick. In the early part of 1837, while in Ohio, he was attacked with erysipelas in the leg, and during five months was without sleep. Mr G. had recovered his health in some degree, when intelligence reached him of the death of two of his children. He then that time to this, a period of four years and six months, he has been entirely deprived of sleep. The last six months of his life has been spent at Boston, his health was much improved, and he entertains a hope that as soon as he is able to take exercise, he will recover. On various occasions of late he has been almost asleep.

Front.—On Thursday last there was a very severe frost in this neighborhood, which did great injury to the potatoes, beans and other vegetables that were forward. It is feared that the fruit has likewise suffered severely.

Commercial News.
ARRIVED.
7 feet water in the channel.

The Rivers are rising and will remain high for some days owing to the heavy rains we have had during Friday night and Saturday.

Cincinnati, May 31.
The River has risen some 10 or 12 feet within the last week. The navigation is good for the largest class boats.

The Licking, in consequence of the recent rains has risen to an uncommon height for the season.—*Cin. Sun.*

The Eveline broke her shaft above Maysville and was towed to Cincinnati by the Clipper.

The River at St. Louis was rising at the latest dates.

PORTABLE.
Hot Water, Shower, Slinger and Steam BATHING TUB!

The subscriber would respectfully announce to his fellow citizens, that he has lately invented a NEW BATHING TUB, which for beauty, neatness and durability, cannot be surpassed. This apparatus is made of the best material, and is so constructed, that it can be used separately, when required, and all in a compact form, as to be strictly portable, and exceedingly easy to manage. The inventor has had it used several months. He finds by exact observation that a tub of water standing at the freezing point, may from 100 to 120 gallons, can be elevated to any height, and will remain in a state of purity, and will not be injured by a quantity of water, or by a quantity of steam, or by a quantity of air, or by a quantity of heat, or by a quantity of cold, or by a quantity of any other substance, or by a quantity of any other thing, or by a quantity of any other matter, or by a quantity of any other element, or by a quantity of any other power, or by a quantity of any other force, or by a quantity of any other agent, or by a quantity of any other cause, or by a quantity of any other effect, or by a quantity of any other result, or by a quantity of any other consequence, or by a quantity of any other circumstance, or by a quantity of any other condition, or by a quantity of any other state, or by a quantity of any other mode, or by a quantity of any other manner, or by a quantity of any other method, or by a quantity of any other means, or by a quantity of any other way, or by a quantity of any other system, or by a quantity of any other plan, or by a quantity of any other scheme, or by a quantity of any other design, or by a quantity of any other project, or by a quantity of any other attempt, or by a quantity of any other enterprise, or by a quantity of any other undertaking, or by a quantity of any other operation, or by a quantity of any other transaction, or by a quantity of any other business, or by a quantity of any other concern, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a quantity of any other thing, or by a quantity of any other object, or by a quantity of any other subject, or by a quantity of any other topic, or by a quantity of any other point, or by a quantity of any other issue, or by a quantity of any other question, or by a quantity of any other matter, or by a
