10 THOSE WHOSE OCCUPATIONS TEND TO PRODUCE OR AGGRAVATE DISEASE. -This class of individuals is very numerous. They are those who work in an unhealthy atmosphere. Printers, workmes in feather stores, stone cutters, bakers, white lead manufacturers, are all more or less subject to disease ac cording to the strength of their constitution. The only method to prevent disease, is the occasional use of a medicine which abstracts from the circulation all deleterious humors, and expels them by the howels. Tonics twany form are injurious, as they only got off the evil will insure health, because they take all impure matter out of the blood; and the body is not weakened but strengthened by their operation, for these valuable Pills do not force, but they assist nature, and are not opposed.
