LATE TRAGEDY AT WARRENTON, VA. We gave yesterday an account of a hostile meeting of two young men at Warrenton Court House, Virginia, in which one of the combatants, Lee, was shot dead y Moore. We are now in possession of facts which

fully explain the cause of the meeting. It appears that a most deadly feud has existed between the families of the young men named, for years. T. L. Moore, formerly a member of Congress, and John Scott, Judge of the General Court, both old federalists, on a previous occasion had a hostile meeting, in which the Judge attempted, and we believe did personally In every situation these rival honora bles were found battling against each other; and the Judge, who is represented as being exceedingly vindictive and arbitrary, as well as crafty, successfully opposed Moore's pretensions to a seat in the House of Delegates, and had his own son nominated and elected. In this manner Judge Scott, having great influence, con-

portion of his liegemen, which ended in the preferment of articles of impeachment against the Judge, before the Ganeral Assembly of Virginia. Here Moore had anopportunity to retaliate, and took advantage of it.was one of the principal witnesses during the trial, and was perhaps more instrumental than any oth-

er man, in procuring the impeachment. The testimony of Moore, that Scott had abused his law of the Judge, and he threatened him with personal riolence. The son of Moore espoused his father's quarrel-a meeting was had, and Lee was killed. This statement we have from a gentleman acquain-

ted with the circumstances, and upon whose authority it is given. It is said that both the young men had ted murder previous to this recontre-one hav ing killed an overseer of a plantation, and the other a female negro slave, while yet in his minority. betree, it were better for justice that both had fallen. GEOGRAPHICAL DISCOVERY IN VIRGINIA.-It is stated in the Richmond Enquirer, that the steam-boat Columbus recently made an exploratory trip up the Appo-matox river to a place called Walthall's Landing, about six miles up, on the Chesterfield side. The water was found to be 20 feet deep, where rocks and shoals were expected to be met with. This discovery is about to be turned to good account, for by a very small sum the distance between Richmond and City Point will be reduced from 45 to 11 miles. Virginia has been settled about two hundred years, and the discovery has only just been made that a river, as familiar to the Virgin-lans as the Mohawk is to New Yorkers, instead of being filled with rocks and shouls, has a mavigable chan-nel 20 to 25 feet deep.
