

of twenty-four miles, we escaped at eight fall, one mile and a half above the lower end of Brady's Island and eight miles, and the water nowhere more than two feet in the island bears the name of a man killed on this spot some years ago. His party had camped on the bank, but, as usual, the wolves had torn him out, and some human bones were lying on the ground we supposed were his. Troops of ravens were hanging on the skirts of the buffalo, kept up an unintermittent howling, and on the banks of the river, during the night, were sitting at a short distance, barking, and impatiently waiting for a departure to fall upon the bones.

**VIRTUOUS POVERTY—THE POOR SEAMEN.**  
Much has been said and written on the blessing attendant on virtue in distress, honesty in want, and industry in adversity. The picture furnished by the sailors of the coast, who are so often to be seen in the streets of our cities, is a picture of the most virtuous poverty. Many have the dull, drowsy, heavy, manly, laborer's face, and the honest, open, and unassuming expression of the honest man. It is indeed the cast of the day's labor, and the honest, open, and unassuming expression of the honest man. **CAL COMMISSIONERS.**—The Denver Argonaut in a furious attack against JAMES CLARKE, one of the democratic candidates for Canal Commissioner, impudently attempts a defence of the infamous conduct of the Ritter Board during the election campaign of 1858. The corruptness practiced by Dickey and Stevens during that memorable election, which the local voters of the city and county are so proud to have forgotten, and which they feel an abhorrence for political fraud and villainy. Who can forget the horrid pimping and shakedown that were fed on the patronage of the sewer local falsehoods that were concocted and published against the democratic party and its prominent officers who had the honor to be elected?

It is well known that the money expended during that year by the Canal Commissioners in their efforts to secure the election of James Clarke, was made the subject of legislative investigation, and that it was discovered that hundreds of thousands had been expended on the credit of the State, and squandered by the Canal Commissioners on the most extravagant and unaccountable manner. The branch road between Mount Carbon and Port Carbon, connecting that portion of the coal field with the main road, will be laid as soon as the landholders, and those interested in its completion will take \$15,000 worth of stock. This branch is of great importance to a considerable portion of the region.
