FOR SAFETY

Travelers should select boats provided with

Life Safety Guards for protecting equipment

It would be well for the traveling community to

be in mind of the fact that the security depends entirely

upon their own encumbrance of boats that have appar-

ently been in the mind of procuring the above appar-

atus. And that every individual making such selec-

tion is contributing towards a general introduction of

an invention adapted by men who understand the

principles of the Steam Engine, to be a sure protec-

tion against those dreadful disasters. You have cer-

tainly, in the hundreds of explosions that have already

been reported, seen that a sufficient margin of safety

is not always provided. It is in every case, to give the

Safety Guard Boat, and in every case, to give the

performance. They have been used in an additional ex-

periment to meet them with a corresponding degree of liber-

ality, and by your preference show that you appreciate their
