got a quarto, and the Junta and corporation gave him more than $30,000."

Choice specimens these, of revolutionary master spirits. A country is indeed fated and cursed whose destinies are influenced by such mercenaries and traitors.

FOR PRESIDENT,

JAS. BUCHANAN,

Subject to the decision of
THE DEMOCRATIC NATIONAL CONVENTION.

The Daily Morning Post.

PHILLIPS & SMITH, EDITORS AND PROPRIETORS.

PITTSBURGH, FRIDAY, NOVEMBER 17, 1843.

MORE RIOTS IN THE CITY OF BROTHERLY LOVE.—Three more outrageous riots have occurred among the Philadelphia Firemen. On Sunday last, a Baltimore Company that had been on a visit to New York, arrived at Philadelphia on their way home, and, to give them a hospitable reception, we suppose, a couple of the Philadelphia Companies turned out and had one of the most bloody fights that has occurred in that city for some time past. The worst feature in their conduct is that after the Baltimoreans had departed for their home, the Philadelphia ruffians charged them with being instrumental in getting up the fight!

The frequency of these riots among the Firemen of Philadelphia is truly disgraceful to the city, and the audacity with which they bid defiance to the laws, shows that nothing but the most summary measures will check their ruffianly proceedings. When their brutal dispositions are roused, no power in the law appears to be able to protect the citizens from their vengeance, and every new outrage but serves to show the impotency of the police to impede the progress of mob law in its most alarming form. If more rigorous measures are not speedily adopted towards the outlaws the citizens of Philadelphia may as well abolish their police and surrender the city into the hands of the rioting Fire Companies.

NEXT GOVERNOR.—The Freeport *Columbian* has declared its preference for FRANCIS R. SHUNK as the next democratic candidate for Governor, and has placed his name at the head of its columns.

A *lady* by the name of LOOMIS is lecturing in Philadelphia on Mesmerism and Phrenology.

EMIGRANTS TO LIBERIA.—Alluding to the embarkation of 80 colored emigrants to Liberia, the Baltimore Clipper says that of the number, "39 were manumitted by the Rev'd Henry Goodwin, a Protestant Episcopal clergyman, residing in Charles county.—This gentleman was present on the occasion, and manifested the greatest interest in their behalf. They were all well clothed, and present a clean and healthy appearance. We believe there were only about eight men, the rest being women and children. Miss Peggy Hodges, of Calvert county, at the time of her death, about three years ago, manumitted 30 slaves, 28 of whom (3 men and 25 women and children) also sailed in this expedition. The remainder some 10 or 12, were free colored persons, who, convinced that their limited freedom here would be greatly increased by their emigration to Cape Palmas, have voluntarily gone out, as we trust, to experience a full realization of all their hopes and anticipations."

NEW YORK.—The democratic majority in New York is about 20,000. The majority in the Legislature will be greater than it was last year; the democrats have 26 of the 32 Senators, and 94 of the 130 members of the House.

The result of the election has shown that there is a settled democratic majority in the state, and that the federalists can have no hopes of a change in that quarter. The result in New York and the other states, has indicated satisfactorily that no effort of our opponents can defeat the democratic candidate for the Presidency in 1844, and the consequence is that in all the great commercial and financial marts of the country, business matters are assuming a more cheerful and permanent aspect, with a certainty that next year the government will be restored to the democracy. We learn from the Plebeian that the effect of this impression in New York, has been an immense advance in the price of the stocks of that state, and of the United States, and in fact, its influence in producing a general revival of confidence, shews itself in an enhanced price of almost all public securities. The substantial interests of the country are always safe in the hands of the democracy, and all the unmeaning twattle, and slang of whig orators and presses about the "destructives" and "locofocoism" cannot satisfy the people to the contrary.

The lamentable results that followed the triumph of federalism in 1840, taught the people a bitter lesson, but it was a lesson from which they derived much benefit, as it served to show them that permanent prosperity could only be obtained under a democratic administration, and all the efforts, arguments and professions of whiggery, were only made for the purpose of obtaining power to carry out the objects of a few leaders for personal aggrandisement, and without the slightest consideration for the welfare of the people.

ANOTHER STEAMBOAT ACCIDENT.—We learn from the Cincinnati Sun that the steamer Martha, bound for Kenawha, was run into by the Rolla, on Saturday last, near Portsmouth, and sunk immediately.

NEW YORK.—Business is becoming languid in New York. The mercantile trade, so far as it consists in supplying country dealers is about over. We see it stated that a heavier business has been done this season than in any preceding one for the last three years, and for any thing which appears the business of the Fall has been of an uncommonly sound character, and larger than ordinary proportion has been transacted for cash.

☞ The Secretary of State of Alabama gives notice in one of the Tuscaloosa papers, that $3,124,240 of the bills of the State Bank and branches have been withdrawn from circulation and destroyed.

PROSPECTS IN NEW ORLEANS FOR THE UNEMPLOYED.—The Picayune of the 3d inst. says:—How many hundred strangers are there even now in the city, seeking employment, who will be unable to find it? They move about in the midst of thousands, unnoticed and unrecognized.—They see—or fancy they see—all people occupied—every one busy, and yet they are idle and unknown. Such a position, in a large and populous city, is solitude in its keenest form.

THE COTTON CROP.—The Vicksburgh Sentinel says—"No rational man now entertains a particle of doubt, that the cotton crop of the present year will fall short at least one third of the average quantity.—The constant rains during the month of September, as well as the present month, have retarded considerably the opening and picking of cotton. We have heard planters say they have not half the amount of cotton picked as yet, which they had at the same date the season, and that from the prospect there is of an immediate frost, they will not be able to ship more than half the number of bales. They remark too, that it requires much more unginned cotton this year to make a bale than they have known for years past."

☞ The rumor of the imprisonment of Ex Governor King of Rhode Island, is contradicted.

THE BRITISH NATIONAL DEBT.—The British National Debt amounts to £770,000,000. According to the London Despatch, it is owing to about 1,500,000 persons, members of the community at large.

Paris is lighted every afternoon by 13,221 lamps, of which, 5,894 are supplied with gas, and 7,331 with oil.

COTTON FACTORY IN ST. LOUIS.—It will be seen by the following from the St. Louis Gazette, that a Cotton Factory has been added to the already incalculable sources of wealth which St. Louis possesses:—

"The Era of yesterday, notices the fact that a cotton factory is about to be put into operation, in a store house situated on Chesnut street, between Main and Water streets. The spindles and machinery will be put up, and the whole soon under way. This is truly a good move, and should be patronized. It will probably be imitated by others, who will take fancy to follow the fashion, as soon as it gets well into operation."

THE COST OF OUR PUBLIC WORKS.

Mr. Hazard, in the last number of his Register, gives a condensed view of the cost, &c., of the Pennsylvania Improvements, to January 1842. The following facts possess interest.

FOR THE POST.

Messrs. Editors—A correspondent in your paper of this morning, speaking of the approaching election for Governor, is not authorized to say to this community that Judge Wilkins has declined being considered a candidate at the next coming election, for that distinguished station.

ONE OF YOUR SUBSCRIBERS.

November 16, 1843

FOR THE POST.

Messrs Editors:—Having called the attention of the committee of Correspondence of the county to the importance of having delegates chosen to represent the Democracy of the county in the convention to assemble at Harrisburgh in March next, to select a candidate to be supported for the office of Governor of this commonwealth, and having stated in that communication that I understood that the Hon. W. Wilkins had declined being a candidate, will you do me the favor to say, that I have been since called upon by a friend of Judge Wilkins who assures me that he had a personal conversation with the Judge, who authorised him to say that it was not the fact. I hope you will correct the error, as I had no intention of interfering with the Judge's prospects. S.

LOWELL, MASS.

Brother Jonathan of the 28th ult., gives a very amusing, interesting and valuable account of that large and flourishing manufacturing city—of 25,000 people, of whom 15,000 are females. Six thousand of them, he says, are their own mistresses—bright eyed, modest, healthy and happy looking women,—girls, who labor diligently and faithfully for their own maintenance, and are able to earn, one week with another, through the year, $1,75 per week, clear of board! As a fact remarkable in its character, Brother Jonathan notices that among a population of 25,000 souls, ten thousand of them are females who require no help, no guardianship, no looking after! They are people of character and good habits, who earn their *own* living, are able to lay up, one year with another, from fifty to seventy-five dollars each, upon an average; some doing a great deal more than that.

The capital stock of the incorporated companies at Lowell, is $10,700,000; the number of mills 32; spindles, 94,333; looms, 6,045; females employed, 6,875; males, 2,345—whose pay together costs considerably more then all the females! the average pay of a male being 70 cents, clear of board, while that of the female is only 29 cents!

The amount of cloth manufactured per week, is 1,331,450; bales of cotton consumed per week, 1,095! Total yearly production of cloth, 70,275,400 years!—Cotton consumed yearly, 22,568,000 pounds; number of bales, 56,940! Consumption of starch, 800,000 pounds per year; charcoal 600,000 bushels; tons of anthracite coal, 12,300; gallons of oil, 80,189; &c

Besides the above mentioned, there are powder mills, bleacheries; card and whip factories; boot and shoe factories; flannel and blanket mills; paper mills; planing machines; grist and saw mills, employing 500 hands and half a million of capital; with a machine shop, able to furnish a mill complete, for five thousand spindles, in four months, and employing from 1,000 to 1,200 hands. These are all facts, and show what a manufacturing community may do, and how it may advance and flourish when well managed and skilfully conducted.

GOLD MINES IN CUBA.

A great deal of interest seems to have been awakened in Cuba on the subject of discovering and working mines, occasioned by the facts published by Mr. Ramon de la Sagra, in his Physical and Statistical History of that Island. The researches which he has made, proves that gold, supposed not to exist in that Island, is to be found in large quantities. The copper mines that have been known since 1772, and which since that period have furnished to the Government bronzed cannon, now furnish a metal upon which is placed the highest estimate. Already, in the eastern portion of the island, the working is very considerable, and new companies are forming to engage in a similar branch of industry in the centre. Numberless discoveries have been made in the vicinity of Puerto Principe, and are enlisting the attention of speculators.

☞ There was good sleighing at Galena, on the 2d inst. The steamer Ohio reports the weather very cold at that place—and that she had difficulty in getting out of Fever river on account of the ice on the 2d inst.—*St. Louis Gazette.*

LOSS OF THE PACKET SHIP SHEFFIELD.

We learn from the New York correspondence of the United States Gazette, that the New York packet ship Sheffield, Popham, from Liverpool, October 8th, with a valuable cargo of dry goods, hardware, &c., consigned to Robert Kermit, arrived off Fire Island, and took a pilot on Saturday, the 11th, at 10 o'clock A. M., wind E. S. E., with rain. At 1, P. M., while in the act of hauling on the wind, she went ashore on the East bank, north of Romer; the sea made a complete breach over her, she striking very hard. The masts were cut away to ease the ship; the water by this time reached nearly to the ceilings. The lady passengers were taken through the sky lights, and took shelter in the round house on deck, in which situation she remained 14 hours. During the night blue lights were burned, which were seen from Staten Island; the steamboat Wave went down at 2, P. M., and took off all the passengers, and all the crew, except the captain and four seamen, who remained with the ship. The wind had lulled, and there was much less sea running at the time the baggage of the steerage passengers was saved, but the greater part belonging to the cabin passengers, was left on board, floating about the cabin. No hopes are entertained of saving the ship. Some of the goods will be recovered, but all will be damaged, as the ship is full of water.

☞ By the complete returns from the several Congressional districts, now first published in the Statesman, it is ascertained that the Democrats have a popular majority of SIX THOUSAND AND EIGHTY-SEVEN. Where's that Gerrymander?

The Whigs may well exclaim, with Pyrrhus, "One more such *victory*, and we are undone."—*Cin. Sun.*

PUNCHISMS.

EXTRACT FROM A STAR GAZER'S DIARY.—Dear Punch—My worthy friends, Sir John Herschell and South, have been sorely puzzled, this week and more, by the spots they discove red on the face of Jupiter. Now, I maintain, with all due submission to the astronomer knights, that the case is as plain as a pike-staff. I think, however, that the best way will be to give you an extract from my Diary on the subject:

"Oct. 2—Thought I'd have a squint at Jupiter—observed him through one of Dolland's telescopes (190 power)—discovered a large spot in his centre.

"Oct. 3—Observed Jupiter again—discovered three fresh spots of reddish color on his disc.

"Oct. 4—Jupiter is covered with spots, and his face is red as a turkeycock's. I begin to have a suspicion of the truth.

"Oct. 5—It is as I suspected—there can be no doubt of it—I'll pledge my diploma to the accuracy of my observations—Jupiter has got the ——— *Measles!*"

I remain, my dear Punch, yours till death,
JOHN STUMP, M. D.

Puseyism in the Church.—We have heard with much horror that the rector of *Ratcliff* Highway, having seen a large rat in the vestry-room, has ordered a cat to be introduced into the building. This is another instance of the alarming spread of *Puseyism.*

Progress of Science.—A tailor advertises, in the daily journals, *geological coats* at ten shillings.—From the price, we should be inclined to think they must belong to the secondry formation.

How to procure Singing Mice.—First catch your mouse, and then mesmerise his "Organ of Tune."

What is the height of imagination?—Having dined at a tavern to imagine you have paid the waiter, and for him to suppose so too.
