of the Aqueduct across the Allegheny river connecting the Pennsylvania Canal with this city, respectfully Re repairs will not be fit, or safe, for the passage of the reight and packet boats next season—that Commissioners from their own shewing, have not a their disposal the necessary funds to put it in order for business; and that in the absence of this channel of com- deep. munication, the trade of our public works will have to seek a depot and outlet in some other, and less convenient place, thun our city. In view of these facts, and in order to show the importance of this matter, it i only necessary to suggest; that in the event of the busi ness depot of the canal being forced to the other sid of the river next season, it will subject every ton of freight from the East for this city and the west, to a tax of at least 25cts. for bridge toll and drayage, and that it will impose the same burthen on every ton of produce going East as well as on all articles of merchandise and Pittsburgh manufacture, sold to the in terior of our State and passing Eastward by our canal. Every barrel of salt, coming into our city, will be subjected to this tax to the rate of at least 5 cents pe barrel, and the same will be the fact with regard to

BLOOMS, marketing &c. Thus it will be seen that i addition to imposing burthens on our own citizens, i will be adding another clog to our State improvements and throwing an influence in favor of the vival route on either side of us.
