ROWAN GOLD MINES. We have in this country the richest gold mine that ADELAIDE has ever yet been discovered in the United States. It as small vein from four to twelve inches wide; many BOSTON. bushels of the material takeh from it have overgone BRILLIANT, \$200 to the bushel and some as high as \$500. We see it stated in the Mochlenburgh Jeffersonian that 11,876 BREAKWATER, dwt. of gold had been taken from it by seven hands about BRIDGE WATER, a month since. As might be expected on so small a CADDO, vein, the water soon become unmanageable, and they began again at the surface and struck a vein parallel to the first, and nearly as rich as that. These veins, asalso all those in that region, are believed to increase in ichness and size as they descend. There are six on seven other mines in the same region of extraordinary richness' and differing in many particulars from the CLIPPER, other vein mines in N. Carolina.—Salisbury Watch-COLUMBU.
