THOMAS PHILLIPS, EDITOR. PITTSBURGH, THURSDAY, JANUARY 25. THE AQUEDUCT .- There is a very curious article

the Advocate of yes, orday in relation to rebuilding the Aqueduct, and the position taken by the editor will astonish many of his readers. He considers it doubtful whether the tolls the city would receive would be enough to pay the interest on the capital expended. If he had taken the trouble to read the report of the Board of Irade, which is published along side of his objections to the Aqueduct, he would find that, taking last year's ousiness as a standard, the tolls on boats alone would amount to the sum of \$9,000. This may be considered certain, as it is not probable that there will be a falling off in the business on our public works, and we presume there are but few capitalists who would not consider the above sum very liberal interest on \$30,-000 or \$40,000. We do not believe any person acquainted with the canal business can entertain a doubt but this could be realized, and with the increase of business that would follow the permanent adoption of the Section Boat System, in a few years it would be greatly augmented.

The assumption that the city has no right to build the Aqueduct, because one end of it will be in the be rough of Allegheny will sound like very strange reasoning to those who have always considered that the State of the kitchen to the other-to the fire-from the fire had full control over its own domain. We have never understood that the city of Allegheny owned any portion of the public works, or that it had any power with an attempt at innocent unconciousness of wrong to prevent the state from making what improvements doing, making confusion worse than chaos; while a it pleased and in whatever manner it deemed most advantageous. The Aqueduct belongs to the State, and iatron of her mistress, whose temper, naturally is of course free from the control of either Pittsburgh congrutities of Honor's mistake and misarrangements. the Advocate will seriously assert any thing to the contrary, or that he will gravely insist that our neighbors to a dead pause at the most important point, over the way, have any power to control the State in
