From 70 inward the women out-number the men. This shows conclusively that, relatively speaking, in comparison with men the heat-thiest period of female life is at the close of it. DR SWAYNE—Dear Sir: Permit me to take the liberty of writing to you at this time to expres my approbation and to recommend to the attention of heads of families and others your invaluable medicine—the Compourd Syrup of Prunus Virginiana, or wild cherry bark. In my travels of late I have seen in a great many instances the wonderful effects of your medicines in relieving children of very obstinate com plaints, such as coughing, wheezing, choking of phlegm sthmatic attacks, &c, &c. I should not have written this letter, however, at present, although I have fel it my duty to add my testimony to it for some time, had it not been for a late instance where the medicine above alluded to was instrumental in restori g to per feet health an "quly child," whose case was almost hopeless, in a family of my acquaintance. I am using it myself in an obstiin an exceedingly short time, considering the severity of the case. I can recommend it in the fullest confidence of its superior virtues; I would advise that no fau ily should be without it; it is very pleasant and ofprice.
