The difference between the whigs and the Laplanders is the former worship the wings and the Laplanders is the former worship a grisly gray coon, and the latter a black cat—which may be suid to be a "distinction without a difference." We have turned to Rees's Encyclopedia, and under the head of Laplander find the following:

"A black cat is reckoned one of the most valuable appendages in each houre: they talk to it as to a rational creature; and in their hunting and fishing parties it is their usual attendant. To this animal the Danish Laplanders communicate their secrets: they consult it on all important occasions; and among the Swedish Laplenders, the drum is kept in every family for the purpose of consulting the devil."
