A gentleman who arrived here in the 12 o'clock stage, gave us the following additional returns: York, 927 for Shunk. Perry, 1143 do. CLEARFIELD COUNTY. We learn from a reliable source that Mr Shunk' majority in Clearfield is 398. This is a guin on the vote of 1840. <i>Absence on Love.</i> -Absence is a trial whose result is often fatal to love; but there are two sorts of absence is on of flattery, amusement, and that variety of objects so destructive to the predominance of one-at least not to trust an incipient attachment to such an ordeal; bi be may safely trust absence which is passed in long in the most imaginative faculty-memory The merits of that lover must be small indeed, whom a few lonely while, the mind filled with those dream ing thoughts which haunt the favorite path in the shrubbery, or under the old trees of the avonne; a few evenings passed singing those ones be once heard; a function of these to stake of the avonne; a few evenings nased singing those ones be once heard; a function of those romantic plans which cocup the thought while the fingers are basy with laceware or satin-stick needleworkwhy, a love dream has fe proved to action of those romantic plans which cocup the thought while the fingers are basy with laceware or satin-stick needlework	elbow informs us that he once knew an eminent ac- tor who, after he had performed for the last time, and made his farewell speech, and retired behind the cur- tain, came lack to adda few words by way of expla- nation. Let the distinguished actor who personnteed different parts with such ingeauity upon the stage of politics, follow his example, and we will insure him ar attentive hearing at least. It is with a sort of pity that we see this man entan- gled in the net of his own words, and, after having en- deavored first to satisfy one side, and then to satisfy the other, by wearying himself in awkward attempt to reconcile what he has said to the different parties. The best policy on all such occasions, is forcibly and clearly to declare one's opinions in their full extent without attempting so to modify their expression a to make them acem what they are not. The mos- successful and popular politician we have had of hat years, has been the man who expressed his politicas opinions with the most openness and directness—An- drew Jackson. All attempts to balance between opposing views when he is not, they are but tokens of incapacity an imbecility. Of the latter, without entertaining an high regard for the reasoning powers of Mr Clay, we cannot suspect him; but of insincerity, of trifling wit his own solemn convictions, and of uttering irreconce hable opinions for the sake of popular effect, we hol him, and the mass of his countrymen hold him, guilty the future. Some sought their homes and on their way they had to puss over a bridge across the river where the water was already knee-deep. On the left of the road was a wall about two hundred yards long, and behind it/a large reservoir. About thirty of the work people agreed to cross the bridge under pretec- tion of this wall. They had passed about half the dis- tance when the hanks of the reservoir gave way and the water fell against the wall, which immediately yield- ded to the pressure, burying upward of twenty of the poor creatures under its ruins. As soon as practicable they were extricated; five of them were dead. Sixteer others were severely injured by fracture of limbs and the silocatious. The body of a sixth was found pax, morning. Others were swept down the stream, but without serious injury. The Sedition Laws.—The following is from the Vermont Gazette, at Bennington, the old democratic press which the whigs said had come out brains the democratic nominations, but which carries the flag o Polk and Dallas: "Forty-four yeurs ago, this day, our honored grand father, Anthony Haswell, editor of the Vermont Gazette, it to the heirs of the said Haswell. 			 Noth of August, Demerara was visited by an earther make more learful than any before experienced. The course of the tremendous motion was from N. N. E. Many of the chronometers stopped, and all the crews of vessels on the river thought they were run foul of by other vessels; brick buildings were rent apart; the inhabitants were in great terror. It all happened on a bright moonlight night. This earthquake was felt with the most severity at the penal settlements, the site of which is racky. The sencession of the buildings themselves and the heavy from fastenings of their dsors and gates, created a tremendous uproar, high above which, however, rose the creams and bellowings of the prisoners, praying to the part who opened his cell as the day dawned, that he had never before known that there was a God Almighty. While the fat of terror lasted, an infant might have led him. More Certificates.—The whigs have been obliges to procue and publish certains from parson Bastom and other ministers, dust Henry Clay is 'Not', so far as they know, guilty of certain gr-ss immorality. So ra minister we will be remained their own reputation; and anothe certificate has now appeared from certain other ministers, Soc., aclaring that parson Bastom is 'Not' is or an impious libellet!' Perhaps this has certificate from still other ministers, that they are not procure and publich the rimisters, that they are not procure the really four on the expansion of the same crimes! How simmefaily is out holy certificate from still other ministers, that they are not public possible of the compelled to procure certificate from still other ministers, that they are not public possible of the case of the really is out their accessaries, to gloss over immorality, and so determine the really pious and good!—N Y Netrs.
