

THE IMPROBABLE OF GOREA.—The editor of the Gazette writes a falsehood against the Post of which he is conscious for the purpose of charging the deflection of McNulty as an offence for which the whole democratic party should be held responsible.

He commences his article with the false assertion that "the Post is very quiet about the Sub-Treasury matter," and concludes it with the following remark: "We fear that this Sub-Treasury matter is only a faint shadow of what we may expect under the new dynasty, when our services will be more considered than merit, and let treasurers be to trust that those who have been discredited by their previous conduct will be re-called upon the fifteen wings; the miserable mania of the nation, who prey upon the emotions, until the whig game has many reasons to convince him of the benefit he would derive by playing the double traitor, and Julia-like, betray those who have confided in him. All our readers will have never said one word that could be turned into an accusation of McNulty's guilt, or in mitigation of the punishment the law prescribes the crime which he committed."

We have not seen a respectable democratic journal that has made any attempt to do the ignominious thing which the deflected papers are trying to accomplish in leaving him to be dealt with by the proper authorities, we are grieved to find that among the whig organs there are not but such calumniating as the editor of the Gazette, who is bound to obey the behest of his fifteen masters, and his worthy compeer of the American, who charge McNulty's offence as a consequence of democratic principles, and attempt to attach the odium of his guilt to the democratic party. As the right-hearted Democrat believes firmly that all political partisans can be bought for any sum not less than three thousand dollars, and that the party that purchases them is bound to defend their corruption, he thinks that even y other base act they may commit should meet with the same lenient treatment in such a case as the present one. The experience, and his successful negotiations with the fifteen wings but he has no right to attribute to others a disposition to look on dishonestly with indifference, from a knowledge of the course he would pursue under similar circumstances.

Was we have wanted to come much in noticing the low estimate of McNulty, we will conclude by advising him that hereafter, when he thinks fit to make such charges against the democratic party, he had better first ascertain that those whom he attacks have not the means of retorting upon, and paying him back with interest. When the Decan can satisfactorily answer the numerous questions that have been asked in the past few days, touching the whig and the Democratic party, as far as the columns of the Gazette during the last Presidential election, and prove that he had an honest adjustment of all his business with his clients and his Church before he took sudden leave of them, it will be time enough for him to cast stones as well as a stone at McNulty.

SURGICAL OPERATION.—MAGNETIC SLEEP.—The N. Y. Evening Post gives a brief account of a very successful surgical operation performed by Dr. Boeher at the Hotel de la Ville, Paris.

A young surgeon from Paris, the operation was the cutting of a tumor from the neck of a young woman, a chambermaid in a family being visited. It is the first surgical operation performed in this country during the magnetic sleep. Dr. B., in order to render his success more sure, threw his patient into the magnetic sleep about ten times, for an hour or two each time, every other day. On the day appointed for the operation, (No. 22) Warren stated and a few other persons, and in a very short time she was in a complete state of insensibility. At half past one o'clock, all the doctors above named being present, Dr. Boeher performed the operation, which lasted about ten minutes, during which the girl did not show the least sensibility, nor could the least connection be seen on her face, or any part of her body, she was exactly like a corpse. All being completed, the girl was left asleep for two hours longer, and then, in presence of five or six of the above mentioned doctors, she was less than three minutes awakened from the most profound sleep.

When she was first asked how she felt, she said she was tired of having remained so long in the same position, but she seemed to be unconscious of what had taken place until she was shown the tumor which had been extracted, and which was about the size of an egg. It was a minute or two before she began to feel the itching of the wound. She was perfectly well, except exhibiting a state of feebleness produced by loss of blood. Since this time, she has been without pain from the wound.

Dr. Boeher is a young surgeon who arrived in N. Y. three months ago from Paris, bringing with him the highest credentials from the most eminent professional men in France. He seems not to have given his attention to animal magnetism, otherwise than as a means of producing, on some particular constitutions, a state of sleep and insensibility, which seldom may be taken advantage of, save to humiliate the suffering and anxiety attending surgical operations, and it was merely with this view that he attempted the three above named experiments which proved to be so successful.

CORPORATION FAVOURS.—It would seem, from the foregoing, that there are other places besides Pittsburgh, where it is good to be a member of Council in order to have improvements made to suit individual convenience. The Morning News, exclaims, "what is it to be an Alderman," (i. e. Councilman) and then goes on: "In the columns of some of the city papers may be found an advertisement signed 'Samuel S. Doughty, Street Commissioner,' and addressed to Quarry Men and Contractors." It invites proposals for paving Broadway from Barclay to Murray street with blocks of granite, ten inches in length and depth, to be in breadth, resting on a bed of concrete made of granite chips and sand, and five inches in powder, of fourteen inches in depth. This will no doubt make an excellent pavement; and we congratulate our most worthy and successful functionary who fills the double and sidelong of this fortunate ward the Third, that the city is about to bestow, upon him and his, such a signal mark of their gratitude for his public services, as will overshadow the proposed pavement at his door—by the desired exclusion of his neighbor on the other side of the street. Unhappy Coleman and Stotom! Why did not you "katho" aldorman?"

INAUGURAL ADDRESS OF FRANCIS R. SHUNK, GOVERNOR OF PENNSYLVANIA, DELIVERED JAN. 21, 1890.

FRANCIS R. SHUNK.—I appear before you in obedience to the will of the Commonwealth, to give the solemn pledge prescribed by the Constitution, and to enter upon the duties of Governor. When I contemplate the interests of our Commonwealth as an independent sovereignty, and as a member of the community of American states, the multiplied relations over which it exerts a supervising guardianship, and the peculiar weighty obligations that press upon it at the present moment, I feel how imperatively I am qualified to discharge, and even to comprehend aright, the arduous and complicated duties which I have been called. To him who watches over the destinies of his State, as well as man, and whose favor is light and strength, I look upwards with humble trust, that He will give me the wisdom and grace to perform the duties of my office, and to discharge with honor the obligations which are laid upon me by the Commonwealth.

FROM THE N. Y. COMMERCIAL ADVERTISER.

The Glasgow Fort contains the following paragraphs concerning Mr. Polk: "The new President of the United States is of Scotch lineage; and his curious looking name is an acknowledgment of a good old Scotch one. Mr. Polk's father's name was said to have been a Lanesborough man of the name of Pollock. In the somewhat peculiar dialect of the upper ward of this county, that name is pronounced 'Pak' and hence, probably, the orthography adopted by the transatlantic branch of the family."

THE STEAMER GREAT BRITAIN.

TRIAL OF SPEED.—The Great Britain was started with six revolutions only, at which she made out 4 knots. On passing Philadelphia, at 12 o'clock, the revolutions were increased to 23 per minute, she made 8 1/2 knots; 101 revolutions gave a log of 7 knots; 102 revolutions a rate of 7 knots. The steam was kept at this point for five minutes, and increased to 12 revolutions, when she gave 8 knots as her rate of speed. At this period, being near the Holmes, the experiment of turning her round with the helm back was tried. She came round in 3 minutes, making a circle of 1/4 mile in diameter. She was then started a second time, with the helm at only 33 degrees, when she came round in a most beautiful manner in only six minutes and 30 seconds, when she was again started a second time, the helm at only 30 degrees, when she came round in a most beautiful manner in only six minutes and 30 seconds, when she was again started a second time, the helm at only 30 degrees, when she came round in a most beautiful manner in only six minutes and 30 seconds.

METTING OF THE BISHOP.—His Grace the Archbishop of Canterbury has announced his intention to summon a meeting of the Bishops of the Province of Canterbury in the month of February, at the request of the Church of England, in order to deliberate and determine upon the substantial observance to be enforced throughout the various dioceses of England, over which his Grace has jurisdiction. The issuing of the present pastoral letter to the Bishops of the Province has caused great excitement among the clergy, and a new source of embarrassment to the Archbishop.

It is, therefore, safe to all probable that an early day will be determined upon by his Lordships, so that the feverish controversies relative to the gown and surplice, and the weekly ceremony may be finally disposed of, and his Grace's authority, which is currently reported to be in a great degree, may be put to the test of the observance of the rubric, so that a due regard may be paid to the scruples of the laity relative to innovations in the church service which may give

offense to the superstitious. In this connection, his Grace is said to have been very fully conversant with the Glasgow Fort contains the following paragraphs concerning Mr. Polk: "The new President of the United States is of Scotch lineage; and his curious looking name is an acknowledgment of a good old Scotch one. Mr. Polk's father's name was said to have been a Lanesborough man of the name of Pollock. In the somewhat peculiar dialect of the upper ward of this county, that name is pronounced 'Pak' and hence, probably, the orthography adopted by the transatlantic branch of the family."
