

Napoleon II. was proclaimed by the Chambers in 1818, which recognized in him a right conferred by the Nation. I accept for him all the modifications discussed by that Chamber, which was rudely dissolved by foreign bayonets. The protest was withdrawn. The young branch of the Bourbons was placed on the throne, and still, as under the elder branch, the name and family of Bonaparte were proscribed from the soil of France.

Abandoning, therefore, not his interest for the honor and welfare of France, but all expectation of being permitted to contribute towards himself, he passed his days in tranquil philosophy on the banks of the Delaware. It was in this retirement that a depiction of leading men from Mexico sought him out, and invited to him a crown in the new world, which, without hesitation, he put aside. In 1839, family affairs required his presence in Europe. In 1840, an attack of apoplexy arrested his previously vigorous health, and he finally expired.

An old man, broken by the storms of State, to visit Florence, in the hope of benefit from its climate, he there created his last will, with his latest breath invoking blessings on that country which had rewarded his services with twenty-nine years of exile. In this country, however, he was known only by benevolent friends. Of most amiable and courteous manners, with admirable conversational powers, which he was ever ready to exercise, he was a man of high intelligence and great energy, and his heart was ever open to the claims of humanity and of the oppressed.

It is comparatively but a few years, since a single Cotton Factory consisted of one or two buildings, and now we see a city of a million people, with its streets and avenues, and a sixth will be constructed during the approaching summer. Of iron and Nail Mills, we can just now think of Ten, which are all doing an active business, and some may have escaped our memory—Of Foundries and Engine Shops, we can form no conception, without taking more time and trouble than we can now bestow on the subject. Pittsburgh would seem to be the chosen spot to procure articles of Iron Manufacture, from the Tack to the Steam Ship—And talking of Steam Ships, here is a branch of industry which the capacities of Pittsburgh have been recently developed; and there has been no time these two or three years, when there has not been from two to four iron vessels on the stocks—a conclusive proof that they can be built better and more cheaply here than at any other place in the Union. We have not time now space to "begin" to enumerate the branches of manufactures in which our mechanics excel all others, nor to give any details which might convey an idea of the immense amount of mercantile business transacted here.

The stranger in Pittsburgh will be struck with the grandeur of the city, and the number of the people who are engaged in the various branches of industry. The city is situated on a narrow peninsula, and is bounded by the Allegheny river on the west, and the Ohio river on the east. The city is a beautiful city, and is one of the most important cities in the West. The city is a beautiful city, and is one of the most important cities in the West.

THE ARMY OF THE UNITED STATES. We learn from an official document, that the Army of the United States is organized thus:

- 1 Major General;
- 2 Brigadier Generals;
- 1 Adjutant General;
- 2 Assistant Adjutant Generals, who are Majors by brevet;
- 4 Captains by brevet;
- 1 Quartermaster General;
- 2 Assistant Quartermasters General;
- 2 Deputy Quartermasters General;
- 4 Quartermasters;
- 23 Assistant Quartermasters;
- 1 Commissary General;
- 1 Assistant Commissary General;
- 2 Commissaries of Subsistence, Majors;
- 1 do do Captains;
- 1 Surgeon General;
- 20 Surgeons;
- 50 Assistant Surgeons;
- 1 Paymaster General;
- 15 Paymasters;
- 17 Military storekeepers;
- 17 Colonial;
- 18 Lieutenant Colonels;
- 26 Majors;
- 2 Adjutants;
- 172 Captains;
- 208 First Lieutenants;
- 168 Second Lieutenants;
- 14 Sergeant Majors;
- 17 Quartermaster Sergeants;
- 168 Second Lieutenants;
- 560 Corporals;
- 18 Principal Musicians;
- 4 Chief Buglers;
- 240 Musicians;
- 20 Farriers and Blacksmiths;
- 80 Artificers;
- 250 Colored Men of Ordnance;
- 6040 Privates;
- 733 Commissioned Officers.

We have also before us an official statement of the whole number of soldiers enlisted in the Army, from October 1st, 1845 to September 30th, 1844:

For general service,	673
By regiments and otherwise,	1,326
Total,	1,999

The Daily Morning Post.

PHILLIPS & W. H. SMITH, EDITORS.
PITTSBURGH, THURSDAY, JANUARY 30.

PROGRESS OF PITTSBURGH.—Although Pittsburgh is known abroad as a great and growing city, it is not generally known that it is one of the most important manufacturing towns in the Union, and every other element of a great manufacturing town; still, those who visit our city are surprised to find the extent and resources of this Pittsburgh. If half the trouble were taken by our people to sound the fame of their city abroad, that the inhabitants of Wheeling, Cincinnati, and other Western towns put themselves to the rapid growth, solid prosperity and unequalled advantages of Pittsburgh would be properly estimated by those who have never set foot within her limits. But Pittsburghers are essentially a working population—and they are so constantly and earnestly engaged in doing what they find to do, that they have no time to spend in the fancy business of sending their eyes a true report of the growing importance of their city.

"Change" is so much a matter of course in a country like ours, that a new project or movement is constantly suggested by some enterprising spirit, and a casual remark, and then we pass on to consider the indications of improvement and prosperity which present themselves on every side.

It is comparatively but a few years, since a single Cotton Factory consisted of one or two buildings, and now we see a city of a million people, with its streets and avenues, and a sixth will be constructed during the approaching summer. Of iron and Nail Mills, we can just now think of Ten, which are all doing an active business, and some may have escaped our memory—Of Foundries and Engine Shops, we can form no conception, without taking more time and trouble than we can now bestow on the subject. Pittsburgh would seem to be the chosen spot to procure articles of Iron Manufacture, from the Tack to the Steam Ship—And talking of Steam Ships, here is a branch of industry which the capacities of Pittsburgh have been recently developed; and there has been no time these two or three years, when there has not been from two to four iron vessels on the stocks—a conclusive proof that they can be built better and more cheaply here than at any other place in the Union. We have not time now space to "begin" to enumerate the branches of manufactures in which our mechanics excel all others, nor to give any details which might convey an idea of the immense amount of mercantile business transacted here.

THE ALBANY STATE AGRICULTURAL SOCIETY.—The Albany State Agricultural Society, which was organized in 1842, has just held its annual meeting at Albany, N. Y. The report of the Society is a very interesting one, and shows that the Society has been very successful in its operations. The Society has been very successful in its operations, and has been very successful in its operations.

THE ILLINOIS CANAL LOAN NEGOTIATED.—The Illinois Canal Loan, which was negotiated by the Illinois Canal Loan Commission, has just been successfully completed. The loan is for the purpose of constructing the Illinois Canal, and is a very important one for the State.

It is interesting to witness the tender solicitude of the Legislature for the poor, and the attention which they have bestowed on the subject of the poor. The Legislature has passed several laws for the relief of the poor, and has been very successful in its operations. The Legislature has been very successful in its operations, and has been very successful in its operations.

THE NEW YORK STATE AGRICULTURAL SOCIETY.—The New York State Agricultural Society, which was organized in 1842, has just held its annual meeting at Albany, N. Y. The report of the Society is a very interesting one, and shows that the Society has been very successful in its operations.
