HUMANITY is deeply indebted to the ingenuity and persevarance of Dr Edmand Landis, a cittzen of Lancaster, Pennsylvania, for a valuable improve-ment in the construction of the Truss for the melioration of Hernia or Bupture, which, after being carefuly tested by application to a number of patients, has ever failed to give relief, and in most cases has proved uccessful in effecting a permanent cure. This improved Truss has been submitted to the most amirent members of the medical profession, who, af-

ter fair trial and examination, have concurred in pronouncing it an important discovery, particularly as it admits of perfect adjustment to the seat of the com-plaint, and of bearing with certainty upon the point where the pressure is required, without admitting of a chance of change or of shifting by any action of the muscles, hip or body, - the outer spring, which is very

elastic, only giving, by which arrangement every move-ment is accommodated. The suffering and imminent danger to life conse
