DOCTOR EDMUND LANDIS'S PATENT DOUBLE SPRING TRUSS. For the Melioration and Cure of Hernia. IUMANITY is deeply indebted to the ingenuity and perseverance of Dr Edmund Landis, a citi-

zen of Lancaster, Pennsylvania, for a valuable improve ent in the construction of the Truss for the melion tion of Hernia or Rupture, which, after being careful tested by application to a number of patients, has never failed to give relief, and in most cases has proved uccessful in effecting a permanent cure. This improved Truss has been submitted to the mus emirent members of the medical profession, who, af ter fair trial and examination, have concurred in proplaint, and of bearing with certainty upon the point where the pressure is required without admitting of chance of change or of shifting by any action of the muscles, hip or body,—the outer spring, which is very elastic, only-giving, by which arrangement every move-

The suffering and imminent danger to life consequent upon that most distressing of all complaints, Strangulated Hernia, need never be apprehended by persons who wear this improved Truss, and the patient may cherish a confident hope, that in consequence of the intestine or omentum never being permitted to protrude in the slightest degree, that the distended ring or opening will gradually contract, and a perma nent cure be effected, when the Truss may be dispensed with altogether.

This Truss may be very properly termed, Dr LAN DIS' COMPOUND SPRING TRUSS; the springs being 2 in number, the inner and the outer, the latter lying over the former. The exterior spring is three times the length of the interior, upon the end of the Gum Camphor, latter the compress or eliptical pad or block is fasten-Making a ship from Liverpool ever five days: the ed, which rests upon the affected part.
