DOCTOR EDMUND LANDIS'S PATENT DOUBLE SPRING TRUSS. For the Melioration and Cure of Hernia.

TUMANITY is deeply indebted to the ingenuity and perseverance of Dr Edmund Landis, a citien of Lancaster, Pennsylvania, for a valuable improvenent in the construction of the Trues for the meliora-tion of Hernia or Rupture, which, after being carefuly tested by application to a number of patients, has never failed to give relief, and in most cases has proved successful in effecting a permanent cure.

This improved Truss has been submitted to the most embers of the medical profession, who, after fair trial and examination, have concurred in pronouncing it an important discovery, particularly as it admits of perfect adjustment to the seat of the complaint, and of bearing with certainty upon the point where the pressure is required, without admitting of a chance of change or of shifting by any action of the muscles, hip or body,—the outer spring, which is very saltpetre.

Juinbe Paste,—Juinbe Paste, lastic, only giving, by which arrangement every move-

ment is accommodated.

The suffering and imminent danger to life consequent upon that most distressing of all complaints, Strangulated Hernia, need never be apprehended by persons who wear this improved Truss, and the patient may cherish a confident hope, that in consequence of the intestine or omentum never being permitted to protrude in the slightest degree, that the distended ling or opening will gradually contract and a permanent. ring or opening will gradually contract, and a permanent cure be effected, when the Truss may be dispens

This Truss may be very properly termed, Dr LAN DIS' COMPOUND SPRING TRUSS; the springs being 2 in number, the inner and the outer, the latter being 2 in number, the inner and the outer, the latter lying over the former. The exterior spring is three lying over the former. The exterior spring is three lying over the former.
