A E DRAKE, Agt.

DOCTOR EDMUND LANDIS'S PATENT DOUBLE SPRING TRUSS. For the Melioration and Oure of Hernia. HUMANITY is deeply indebted to the ingenuity and perseverance of Dr Edmund Landis, a citi

n of Lancaster, Pennsylvania, for avaluable improve ent in the construction of the Truss for the melioraion of Hernia or Rupture, which, after being carefultested by application to a number of patients, has ever failed to give relief, and in most cases has proved uccessful in effecting a permanent cure.
This improved Truss has been submitted to the most minent members of the medical profession, who, after fair trial and examination, have concurred in pro- Gum Arabic, nouncing it an important discovery, particularly as it | Epsom Salts, admits of perfect adjustment to the seat of the complaint, and of bearing with certainty upon the point where the pressure is required, without admitting of a chance of change or of shifting by any action of the

ment is accommodated.

The suffering and imminent danger to life consequent upon that most distressing of all complaints, Strangulated Hernia, need never be apprehended by persons who wear this improved Truss, and the patient nay cherish a confident hope, that in consequence of the intestine or omentum never being permitted to protrude in the slightest degree, that the distended ring or opening will gradually contract, and a permanent cure be effected, when the Truss may be dispens-

ed with altogether.

This Truss may be very properly termed, Dr LAN DIS' COMPOUND SPRING TRUSS; the springs being 2 in number, the inner and the outer, the latter ool Packets, and The United Line of Liverpool excepts.

In manner, the interior, upon the end of the latter the compress or eliptical pad or block is fasten.

Making a ship from Liverpool ever five days; the latter the compress or eliptical pad or block is fasten.

The exterior spring is three times the length of the interior, upon the end of the latter the compress or eliptical pad or block is fasten.

The exterior spring is three times this services that he has taken an office in Smithfield street. 2d door from Virgin alley, where latter the compress or eliptical pad or block is fasten. possibility of delay is therefore precluded. Mr W Tap-scott (one of the firm) personally superintends the small adjusting series, which passes through the outer small adjusting series, which passes through the outer suring immediately over the pad or black, and is spring, immediately over the pad or block, and is formed to bear upon any part of the block, so that the pressure can be made to act immediataly upon or over the rupture with the degree of force or weight which the case may require. The whole apparatus is so adjusted as to fit any peculiarity of form, at the same ime so flexible as to occasion neither inconvenience nor uneasiness to the wearer, while following his usual

> The following distinguished members of the Medical profession have borne ample and unqualified testimony to the palliative and curative value and importance of Dr Landis' discovery: George B Kerfoot, M.D., and John L Atlee, M.D., of Lancaster; Geo M. Clelland, M.D., Professor of Surgery in the Pennsyl vania and Jefferson College, and Samuel M'Clelland, d D., Professor of Anatomy in the same college; Sumuel Martin, M. D., Professor of Anatomy in the Pennsyl ania College, &c.; James M'Clintock, M.D., Prosor of Surgery in Vermont College, &c.; John Wiltrofessor of Materia Medica in the Pennsylvania Medcal College; to which we add with pleasure the resectable names of S Snyder, M.D., J. K.Neff, M.D., L Baker, M D., and Henry Carpenter, M D., of
