NOMINATIONS BY CAUCUS.—The democracy of Pennsylvania has a duty to perform, this year, of the highest importance to its harmony and integrity.

From some cause or other, within a few years, certain members of the legislature have acted upon the idea that there was no party obligation to adhere to the nomination made in legislative caucuses, and under the influence of this idea, we have seen a State Treasurer and a State Senator chosen in defiance of such nominations.

Such a discussion would be profitable and interesting. If their political character and conduct were unimpeachable, previous to their election, they would have been open to great and deserved censure.

If their political character and conduct were unimpeachable, previous to their election, they would have been open to great and deserved censure. We believe that Mr. Marx made a good Treasurer.

City Matters.—In C. C. the following petitions were presented: For the increase of the night watch. For the enlargement of the Water Pipes in the 5th Ward.

Resolved, That we deeply sympathize with his family in their bereavement, and with our fellow citizens throughout the Union, in the demise of our friend and good friend Andrew Jackson.

Resolved, That in our opinion the vicious and traitorous act (as an Arnold) may be said to never live; while the virtuous and good (as a Washington) never die.

Resolved, That a committee of five be appointed, two from the Select and three from the Common Council, to make such arrangements as to them may seem appropriate, and to confer with any other committee or committees which have or may be hereafter appointed for the same purpose, and report to Council on Wednesday next.

PROSPECT FOR A DUEL.—The editor of the Vicksburg Sentinel has, in some unaccountable manner, perhaps expresses his disapproval, and in particular, writes the editor a number of insulting letters.

This is almost the same as saying, "I am ready to accept an invitation to pistols and coffee, and will be happy to give you a small token of my regard at any time and place you may choose to designate."

THE GREAT EMERSON.—The question of authorizing a Convention in Virginia to amend the Constitution, will doubtless be a very prominent matter among the deliberations of the next Legislature.

NAVY DEPARTMENT.—The officers of the navy are highly delighted with the recent regulations relative to changes in their uniforms.

TEXAS ELECTION.—The aggregate number of votes cast for President of Texas at the election 23d Sept. 1844, in the thirty six counties, was 12,732.

IMPORTANT MOVEMENT.—The Illinois State Register states that Com. Morris, has been ordered by the Government to survey and explore the route between Peoria and Chicago, and report as to the practicability, expense, &c. of a ship canal connecting the Illinois river with the Lake and the Gulf of Mexico.

THE CRUISE.—An extract of a letter, dated Calcutta April 4th, to the New York Journal of Commerce, says:—The cholera is raging here. From five to six hundred die daily; though not many among the shipping.

THE HON. GEORGE BAKER.—The Union has consented to deliver an eulogium upon Gen. Jackson, at the request of the Democratic Association at Washington.

THE BIO CHINESE LETTER.—This singular document, says the Washington Union of Saturday, which perhaps expresses his disapproval, and in particular, writes the editor a number of insulting letters.

The letter to the President consists of a roll 7 feet 11 inches long, by 2 feet 11 inches wide. The writing is in a fine plain yellow silk, with a margin of silk of the same color embroidered in gold thread.

LIFE IN TEXAS.—We have been somewhat liberally amused at a description, furnished the Providence Journal by a resident correspondent of the capital of Texas, and some of the principal cities in that metropolitan. The writer was rather surprised at the primitive simplicity of things in that quarter, and did not appear particularly to relish either the log houses or the bears about Washington.

The capital is described as a small village of wooden houses mostly log cabins, containing some five or six hundred inhabitants. The principal hotel containing a general sleeping room, consisting of a large and unfurnished garret where one could lay contemplating the naked beams and rafters, and their relations to each other.
