DOCTOR EDMUND LANDIS'S PATENT DOUBLE SPRING TRUSS.

For the Melioration and Cure of Hernia. UMANITY is deeply indebted to the ingenuity and perseverance of Dr Edmund Landis, a citien of Lancaster, Pennsylvania, for avaluable improveent in the construction of the Truss for the melioran of Hernia or Rupture, which, after being carefulby tested by application to a number of patients, has never failed to give relief, and in most cases has proved uccessful in effecting a permanent cure.
This improved Trusshas been submitted to the most emirent members of the medical profession, who, after fair trial and examination, have concurred in proouncing it an important discovery, particularly as it admits of perfect adjustment to the seat of the complaint, and of bearing with certainty upon the point Gum Opium, where the pressure is required, without admitting of a chance of change or of shifting by any action of the Flor Camomile, nuscles, hip or body,—the outer spring, which is very | Salipetre,

nent is accommodated.

The suffering and imminent danger to life consement upon that most distressing of all complaints, Strangulated Hernia, need never be apprehended by persons who wear this improved Truss, and the patient may cherish a confident hope, that in consequence of the intestine or omentum never being permitted to protrude in the slightest degree, that the distonded ring or opening will gradually contract, and a permanent cure be effected, when the Truss may be dispens-

d with altogether. This Truss may be very properly termed, Dr LAN DIS' COMPOUND SPRING TRUSS; the springs being 2 in number, the inner and the outer, the latter lying over the former. The exterior spring is three times the length of the interior, upon the end of the latter the compress or eliptical pad or block is fastened, which rests upon the affected part. There is a small adjusting screw, which passes through the outer from 9 till 12, and from 2 till 5. may 2-dewtf. pring, immediately over the pad or block, and is formed to bear upon any part of the block, so that the pressure can be made to act immediataly upon or over the rupture with the degree of force or weight which he case may require. The whole apparatus is so adjusted as to fit any peculiarity of form, at the same time so flexible as to occasion neither inconvenience nor uneasiness to the wearer, while following his usual vocations.

The following distinguished members of the Medcal profession have borne ample and unqualified testiprincipal towns, without discount or any other charge. mony to the pulliative and curative value and importance of Dr Landis' discovery: George B Kerfoot, M D., and John L Atlee, M D., of Laucuster; Geo M' Clelland, M.D., Professor of Surgery in the Pennsyl vania and Jefferson College, and Samuel M'Clelland M.D., Professor of Anatomy in the same college; Samuel Martin, M. D., Professor of Anatomy in the Pennsylvania College, &c.; James M'Clintock, M D., Pro esser of Surgery in Vermont College, &cc.; John Wiltbank, M D., and W B Grant, M D., Professor in the Pennsylvania College; Henry G Patterson, M D., Professor of Materia Medica in the Pennsylvania Medical College; to which we add with pleasure the respectable names of S Snyder, M D., J K Neff, M D., C L Buker, M D., and Henry Carpenter, M D., of

H H McCULLOUGH having purchased the patent right for making and vending the above TRUSS, is repared to furnish them to all who may be afflicted with that disease. He is also prepared to fill all or-ders from Physicians and Druggists, and solicits their patronage. He will attend to applying the instrunent; believing it to be superior to anything of the kind ever invented. He has put the price so low that it is within the reach of all. The testimonials of the eminent Physicians, whose names are above appended, are deemed sufficient recommendations.
