For every want of ours. For luxniy, medicine and toil, And yet-have had no flowers, The ore within the mountain mine Requireth none to grow, Nor does it need the lotus flower

To make the river flow, The clouds might give abundant rain, The nightly dews might fall, And the herb that keepeth life in man,

Might yet have drunk them all. Then wherefore, wherefore were they made, And dyed with rainbow light, All fashioned with supremest grace, Upspringing day and night.

Springing in valleys green and low, And on the mountains high, And in the silent wilderness, Where no man passeth by,

Our outward life requires them not, Then wherefore had they birth, To minister delight to man-To beautify the earth.

THE ROMANCE OF INSECT LIFE. We take the following beautiful extract from a Hisorical tecture by Judge Charlton of Georgia: "The earth teems with mysteries-the sky shines with them—they float in the air—they swim in the deep—they floah from the dark robed clouds—they whisper in the gentle tones of the summer windthey speak in trumpet tongnes, in the voice of the tempest and the thunder. THE FOOD OF MAN.

The potato is a native of South America, and is still found wild in Chili, Peru, and Monte Video. In its native state, the root is small and bitter. The first mention of it by European writers, is in 1588. It is now spread over the world. Wheat and fye originated in Tartary and Siberia, where they are still indigenous. The only country where oats is found wild is in Ahvasinia. and there it may be considered a native.-Maize, or Indian corn, is a native of Mexico, and was unknown in Europe until after the discoveries of Co-lumbus. The bread fruit tree is a native of the South Sea Islands, particularly Otoheite. Tea is found a native no where except in China and Japan, from which country the world is supplied. The cocoa-nut is a native of most equinoctial countries, and is one of the most valuable trees, as food, clothing and shelter, are afforded by it. Coffee is a native of Arabia Felix but is now spread into both the

East and West Indies. The best coffee is from Mocha, in Arabia, whence about 14,000,000 of pounds are annually exported. St. Demingo furnishes from 60 to 70,000,000 of pounds yearly. All the varieties of the apple are derived from the crab apple, which is found native in most parts of the world.

The peach is derived from Persia, where it still grows in a native state, small, bitter, and with poisonous qualities. Tobacco, is a native of Mexico and South America, and lately one species has been found in New Holland. Tobacco was first introduced into England from North Carolina, in 1586, by Walter Ra-leigh.
