Prospectus of the New Library of Law and Equity,

This work contains the best productions of English Taw authors, without regard to priority of claim on the part of any American publisher. Such books are now notoriously too dear. The reason is, that as fast as they appear they become monopolies in the hands of booksellers in the Atlantic cities. Under the plea of right acquired by the addition of notes of American decisions, the latter claim an undivided title to those works, and set a burthensome price on them.—
The publishers of the work now offered to the profession througout the Union, will not respect such titles, Do not Pass the Three Bir Doors. but will re-print the standard British law books as fast as they eminate from the London market.
